

STEVAL-BCN002V1B

FCC ID Label

IC Label

The FCC and IC label IDs are printed on the bottom of the PCB of the STEVAL-BCN002v1.

Notes:

1. The color of the STEVAL-BCN002v1 engineering samples board used for laboratory testing was GREEN
2. To make the label more visible the color of the STEVAL-BCN002v1 board in production will be set to WHITE as shown in the pictures below. There aren't functional changes between the two boards: just the color of PCB has been change (from green to white) and the label FCC and IC IDs has been added.
