Subject: Module Approval

Date: 8/22/2016

FCC ID: S9NSTILE01

Regarding to the FCC 15.212, ST Microelectronics S.R.L. would like to request modular approval for the submission FCC ID: S9NSTILE01. ST Microelectronics S.R.L. confirms that the product complies with numbered requirements identified below:

1. The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly;
Ans: The modular transmitter has no their own shielding. N
2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal;
Ans: This modular transmitter has buffered modulation/data inputs. Y
3. The module must contain power supply regulation on the module;
Ans: It has its own power supply. Y
4. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b);
Ans: The device has a chip antenna. Y
5. The module must demonstrate compliance in a stand-alone configuration;
Ans; The modular transmitter was tested in a representative host (model number: STDK-STILECX01V1).
N
6. The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements);
Ans: FCC ID label format will be included in the filling. Y
7. The module must comply with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions by the grantee;
Ans: The EUT is compliant with all applicable FCC rules. Detail instructions for maintaining compliance are given in the Users Manual. Y
8. The module must comply with RF exposure requirements
Ans: The module does not have to calculate RF exposure. N
