RE: ELITEGROUP COMPUTER SYSTEMS., Co., LTD.

FCC ID: SA6G553IBXX

After a review of the submitted information, I have a few comments on the above referenced Application.

Administrative Issues:

- 1) The Revised users manual mentions that the power varies depending on the distance from the base station. While this is the case for most licensed Transmitters, I am not aware that this is typical of 802.11 device. The power is usually set by the user.
- 2) Additionally, it would be recommended to reword "when worn on the body" to "when placed next to the body".
- 3) No plot appear to be provided for above 3 GHz. This device should be tested to approximately 25 GHz. Please confirm this was performed.
- 4) The device appears to contain 2 antennas. Where both pre-tested to determine worse case?
