

## FCC Information

Federal Communications Commission Radio Frequency Interference Statement.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ? Reorient or relocate the receiving antenna.
- ? Increase the separation between the equipment and receiver.
- ? Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ? Consult the dealer or an experienced radio/TV technician for help.

Any user that changes or modifies these devices not expressly approved by the party responsible for compliance will void the user's authority to operate the equipment.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

7011 Koll Center Parkway  
Suite 150  
Pleasanton, CA 94566  
(925) 461-4510

## USB Receiver

Connect the CADE Receiver to any USB port on the Virtual Classroom PC with the cable provided. The Receiver is self-configuring so no special installation is necessary. The drivers for the Receiver are installed during the installation of the Virtual Classroom software by checking the “Use USB” label on the Setup Dialog.

## Remote Control

The CADE Remote Control requires no setup or special installation. Pressing the red button turns on the remote and it is ready to use. It operates on two AAA batteries and will automatically turn itself off after one hour of inactivity. Each remote contains a unique ID that differentiates it from all other remotes. The Remote uses radio frequency for communication and has a range of about 100 meters. There is no limit to the number of remotes at any single location.

## Testing the Remote and Receiver

To test the Receiver and Remote Controls, click Start, Programs, CADE, CADE Remote Control Setup to bring up the Remote Control Setup Dialog.

Turn on each remote by pushing the red, “On” button and then press one of the buttons on the face of the Remote. You will see the Remote’s ID number and the button you pressed appear in the dialog box. If you should fail to see a number appear:

- ? Check to make sure the receiver is plugged in
- ? Check the batteries in the remote

## Using the CADE Remote Control

After the Virtual Classroom program has been started, you will be allowed to enter your personal ID. Click the logon button on the Virtual Classroom screen and a dialog box will appear asking you to press the “On” button on your remote. Press “On” and any number to identify yourself to the system. This establishes the relationship between you and the remote for the duration of the broadcast.

If you have any questions, please see your Site Coordinator for more information.
