# Curtis-Straus Test Report

Report No	EE0362-1
Client	Saflok 1950 Austin Drive Troy, MI 48083
Phone Fax FRN	(248) 680-8484 (248) 680-8468 0010936649
Model	MI
FCC ID	SAPMESSENGER
Equipment Type Equipment Code	Spread Spectrum Transmitter DSS
Results	As detailed within this report
Prepared by	Evan Janl Evan Gould – Test Engineer
Authorized by	Michael Buchholz – EMC Manager
Issue Date	6/10/04
Conditions of issue	This Test Report is issued subject to the conditions stated in 'terms and conditions' section of this report.

Curtis-Straus LLC is accredited by the American Association for Laboratory Accreditation for the specific scope of accreditation under Certificate Number 1627-01. This report may contain data which is not covered by the A2LA accreditation.

## Summary

This test report supports an application for modular certification of a transmitter operating pursuant to 47 CFR 15.247. The product is the Saflok Messenger (Model MI). It is a frequency hopper that operates in the range 902-928MHz. It utilizes a pseudorandom hopping table of 50 channels.

## Test Methodology

Radiated emissions testing is performed according to the procedures specified in ANSI C63.4 (2002). Public Notice DA 00-705 "Filing and Measurement Guidelines for Frequency Hopping Spread Spectrum Systems" was followed for testing as well. Emissions were maximized by rotating the EUT around three orthogonal axes as well as varying the test antenna's height and polarity. EUT was battery powered. Fresh batteries were used for testing.

Frequency range investigated:	0.15MHz – 10GHz	
Measurement distance:	0.15 - 30MHz 30 - 1000MHz 1 – 10GHz	Conducted 3m 1m

AC Line conducted emissions testing was performed with a  $50\Omega/50\mu$ H LISN.

The TX antenna is board mounted and can not be maximized separately.

## Statement of Conformity

The Messenger has been found to conform to the following parts of 47 CFR as detailed below:

Part 2	Part 15	Comments
	15.15(b)	There are no controls accessible to the user that adjust the
		power level on this device.
2.925	15.19	The label is shown in the label exhibit.
	15.21	Information to the user is shown in the instruction manual exhibit.
	15.27	No special accessories are required for compliance.
	15.203	The antenna is soldered directly to the transmitter board.
	15.205	The fundamental is not in a Restricted band and the spurious
	15.209	and harmonic emissions in the Restricted bands comply with the
		general emission limits of 15.209.
	15.207	The unit meets the AC conducted emissions requirements of
		15.207.
	15.247	The unit complies with the frequency hopper requirements of
		15.247
	15.247(b)(5)	See attached MPE Calculation exhibit

## 20dB Bandwidth MEASUREMENT

The 20dB bandwidth measured 42.5kHz. This value was used as the limit for the channel separation requirement.

## ANALYZER PLOT

## Channel Separation

## <u>REQUIREMENT</u>

*"Frequency hopping systems shall have hopping channel carrier frequencies separated by a minimum of 25 kHz or the 20 dB bandwidth of the hopping channel, whichever is greater."* [15.247(a)(1)]

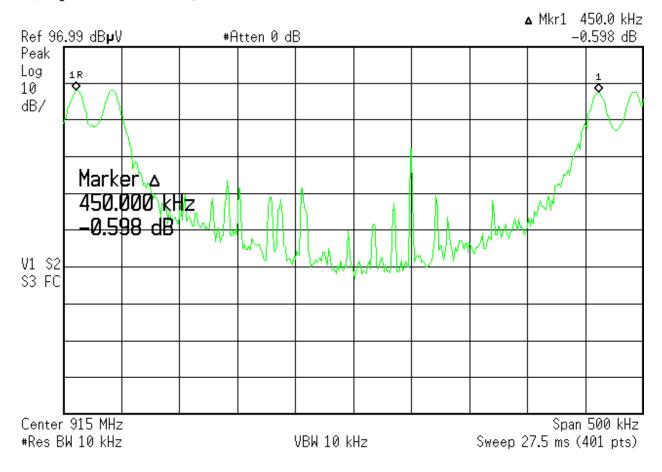

20dB bandwidth = 42.5kHz (see "20dB Bandwidth" section)

## **MEASUREMENT**

Channel separation = 450kHz

## ANALYZER PLOT

**Agilent** 14:58:47 May 26, 2004

## Number of Hopping Frequencies

## REQUIREMENT

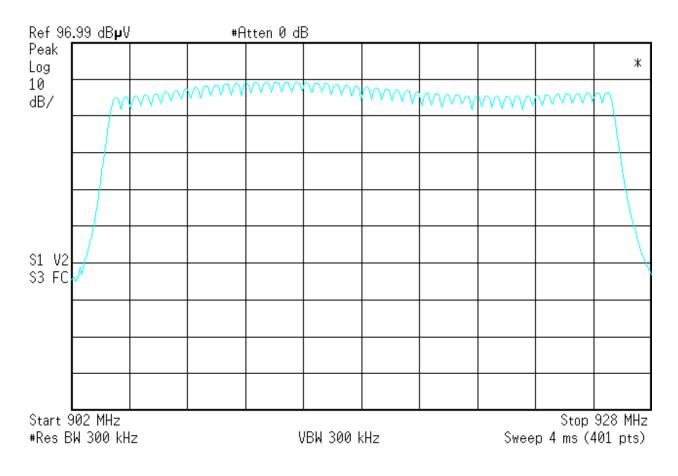

*"For frequency hopping systems operating in the 902-928 MHz band: if the 20 dB bandwidth of the hopping channel is less than 250kHz, the system shall use at least 50 hopping frequencies..."* [15.247(a)(1)(i)]

## **MEASUREMENT**

Number of Hopping Frequencies = 50

## ANALYZER PLOT

## Time of Occupancy (Dwell Time) REQUIREMENT

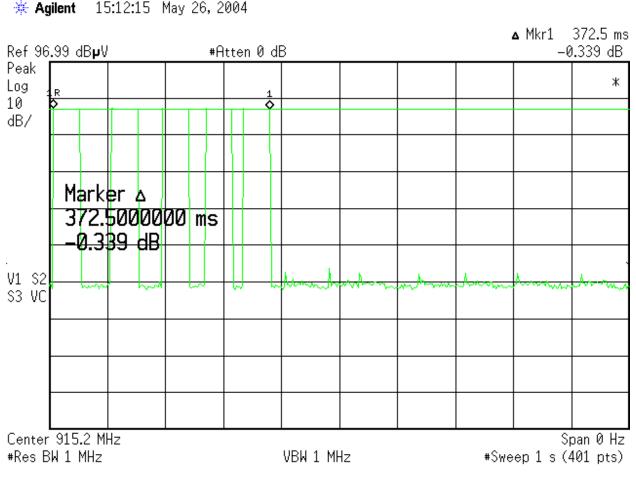

"The average time of occupancy on any channel shall not be greater than 0.4 seconds within a period of 0.4 seconds multiplied by the number of hopping channels employed" [15.247(a)(1)(iii)]

"...the average time of occupancy on any frequency shall not be greater than 0.4 seconds within a 20 second period;" [14.247(a)(1)(i)]

## **MEASUREMENTS**

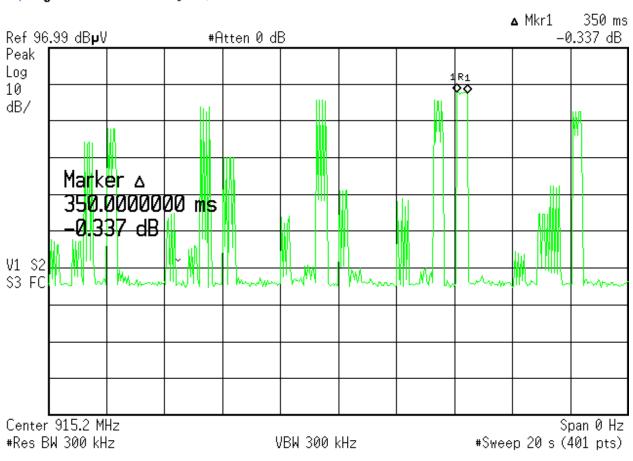

Individual dwell time < 0.4s Total dwell time within 20s < 0.4s

## ANALYZER PLOTS

#### **Dwell Time Within 20s Period**

🔆 Agilent 15:14:50 May 26, 2004

## Peak Output Power

## <u>LIMIT</u>

"The maximum peak output power of...systems operating in the 902-928 MHz band: 1 watt for systems employing at least 50 hopping channels." [15.247(b)(2)]

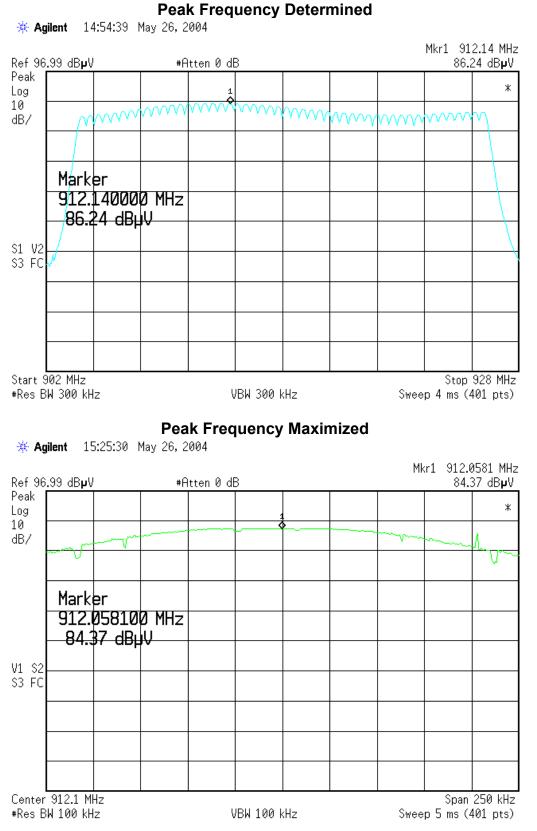

### **MEASUREMENT**

In order to obtain a worst case measurement, a maximized peak trace of the entire band of operation was taken, and the highest channel was determined and measured with a reduced frequency span.

## **Band Edges**

## <u>LIMIT</u>

Peak: 20dB down from fundamental [15.247(c)]

## **RESULTS**

It can easily be seen in the plots shown below that the band edges are at least 20dB down from the peak of the fundamental.

Although the product is battery powered, it was adapted to work with an AC/DC brick to simulate installation in an AC powered host product.

## Voltage Variation

## REQUIREMENT

"For intentional radiators, measurements of the variation of the...radiated signal level of the fundamental frequency component of the emission...shall be performed with the supply voltage varied between 85% and 115% of the nominal rated supply voltage." [15.31(e)]

## **MEASUREMENTS**

All equipment is calibrated using standards traceable to NIST or other nationally recognized calibration standard.

## Terms And Conditions

Paragraph 1. SERVICES. LABORATORY will:

- Use the degree of care and skill ordinarily exercised by and consistent with the standards of the profession. 1 1
- Perform all technical services in substantial accordance with the generally accepted laboratory principles and practices. 1.2
- 1.3 Retain all pertinent records relating to the services performed for a period of three (3) years following submission of the report describing such services, during which period the records will be made available to CLIENT upon reasonable request.

Paragraph 2. CLIENT'S RESPONSIBILITIES. CLIENT or his authorized representative will:

- 2.1 Provide LABORATORY with all plans, schematics, specifications, addenda, change orders, drawings and other information for the proper
- performance of technical services. Designate a person to act as CLIENT's representative with respect to LABORATORY's services to be performed on behalf of the 2.2 CLIENT; such person or firm to have complete authority to transmit instructions, receive information and data, interpret and define CLIENT's policies and decisions with respect to the LABORATORY's work on behalf of the CLIENT and to order, at CLIENT's expense, such technical services as may be required.
- Designate a person who is authorized to receive copies of LABORATORY's reports.
- 2.4 Undertake the following:
  - (a) Secure and deliver to LABORATORY, without cost to LABORATORY, preliminary representative samples of the equipment proposed to require technical services, together with any relevant data. Furnish such labor and equipment needed by LABORATORY to handle samples at the LABORATORY and to facilitate the specified
  - (b) technical services.

#### GENERAL CONDITIONS: Paragraph 3.

- 3.1 LABORATORY, by the performance of services covered hereunder, does not in any way assume any of those duties or responsibilities customarily vested in the CLIENT, its employees, or any other party, agency or authority.
- 32 LABORATORY shall not be responsible for acts of omissions of any other party or parties involved in the design, manufacture or maintenance of the equipment or the failure of any employee, contractor or subcontractor to undertake any aspect of equipment's design, manufacture or maintenance.
- LABORATORY is not authorized to revoke, alter, release, enlarge or release any requirement of the equipment's design, manufacture or maintenance unless specifically authorized by CLIENT or his authorized representative. THE ONLY WARRANTY MADE BY LABORATORY IN CONNECTION WITH ITS SERVICE PERFORMED HEREUNDER IS 33
- 34 THAT IT WILL USE THAT DEGREE OF CARE AND SKILL AS SET FORTH IN PARAGRAPH I ABOVE. NO OTHER WARRANTY, EXPRESS OR IMPLIED, IS MADE OR INTENDED FOR SERVICES PROVIDED HEREUNDER. Where the LABORATORY indicates that additional testing is advisable to obtain more valid or useful data, and where such testing has not
- 35
- been authorized, CLIENT agrees to view such test reports as inconclusive and preliminary. The LABORATORY will supply technical service and prepare a report based solely on the sample submitted to the LABORATORY by the CLIENT. The CLIENT understands that application of the data to other devices is highly speculative and should be applied with 3.6 extreme caution
- 3.7 The LABORATORY agrees to exercise ordinary care in receiving, preserving and shipping (F.O.B. Littleton, MA) any sample to be tested, but assumes no responsibility for damages, either direct or consequential, which arise from loss, damage or destruction of the samples due to the act of examination, modification or testing, or technical services or circumstances beyond LABORATORY's control.
- 3.8 The LABORATORY will hold samples for thirty (30) days after tests are completed, or until the CLIENT's outstanding debts to the LABORATORY are satisfied, whichever is later. 39
- The CLIENT recognizes that generally accepted error variances apply and agrees to consider such error variances in its use of test data. 3.10 It is agreed between LABORATORY and CLIENT that no distribution of any tests, reports or analysis other than that described below shall be made to any third party without the prior written consent of both parties unless such distribution is mandated by operation of law. It is agreed that tests, reports, or analysis results may be disclosed to third party auditors of the laboratory at the laboratory facility in the course of accreditation maintenance audits. No reference to reports or technical services of the LABORATORY shall be made in any
- advertising or promotional literature without the express written permission of the LABORATORY. 3.11 The CLIENT acknowledges that all employees of LABORATORY operate under employment contracts with the LABORATORY and CLIENT agrees not to solicit employment of such employees or to solicit information related to other clients from said employees.
- 3.12 In recognition of the relative risks and benefits of the project to both CLIENT and LABORATORY, the risks have been allocated such that the CLIENT agrees, to the fullest extent permitted by law, to limit the liability of the LABORATORY to the CLIENT for any and all claims, losses, costs, damages of any nature whatsoever or claims expenses from any cause or causes, including attorneys' fees and costs and expert witness fees and costs, so that the total aggregate liability of the LABORATORY to the CLIENT shall not exceed \$100,000, or the LABORATORY'S total fee for services rendered on this project, whichever is greater. It is intended that this limitation apply to any and all liability or cause of action however alleged or arising, unless otherwise prohibited by law.

#### Paragraph 4. INSURANCE:

- LABORATORY shall secure and maintain throughout the full period of the services provided to the CLIENT adequate insurance to protect it from claims under applicable Workmen's Compensation Acts and also shall maintain one million dollars of general liability 41
- protect it from claims under applicable workmen's Compensation Acts and also shall maintain one minion doma's or general natively coverage to cover claims for bodily injury, death or property damage as may arise from the performance of its services. The CLIENT hereby warrants that it has sufficient insurance to protect its employees adequately under applicable Workmen's Compensation Acts and for bodily injury, death, or property damage. No insurance of whatever kind or type, which may be carried by either party is to be considered as in any way limiting any other party's ware unwithing the damages resulting from their operations or for furniching work and materials. 4.2
- 4.3 responsibility for damages resulting from their operations or for furnishing work and materials.

#### Paragraph 5. PAYMENT:

5.1 CLIENT shall pay to LABORATORY such fees for services as previously agreed, orally or in writing, within 30 days of presentment of a bill for such services performed. In the event CLIENT ordered, orally or in writing, services but such services were not assigned a rate for billing, such services shall be billed at the LABORATORY's reasonable and customary rate.

#### REPORT: EE0362-1

- CLIENT shall be responsible for all shipping, customs and other expenses related to services provided by LABORATORY to the CLIENT, and shall fully insure any test sample or other equipment provided to LABORATORY by the CLIENT. Amounts overdue from CLIENT to LABORATORY shall be charged interest at a rate of 1½% per month. 5.2
- 5.3

#### Paragraph 6. ISO/IEC GUIDE 17025 ADDITIONS:

- CLIENT agrees that this test report will not be reproduced except in full, without written approval from the LABORATORY. 6.1
- 6.2
- Government. 6.3 CLIENT agrees that test results presented herein relate only to the sample tested by the LABORATORY.
