## Safety Information

- Do not use the handset during drive for preventing from accident.
- Please power off the handset on airplane.
- Do not use the handset when holding the antenna. Holding the antenna affects the call quality and may cause the telephone to operate at a higher power level than needed.
- For safety use, use only adapter approved by Hisense. To all problems arising from not following this guide, Hisense does not bear responsibility.
- Avoid exposure to high temperature or humidity. Avoid wetting the unit with any liquid. If the unit gets wet, turn the power off immediately and remove the backup batteries and AC power supply.
- Keep it dry. Precipitation, humidity, and liquids contain minerals that will corrode electronic circuits.
- Do not use or store it in dusty, dirty areas as its parts can be damaged.
- Do not store it in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics. We need to mention temperatures here, as this is subjective.
- Do not store it in cold areas. When the phone warms up to its normal operating temperature, moisture can form inside the phone, which could damage the phone's electronic circuit boards. We need to mention temperatures here, as this is subjective.
- Do not attempt to open it. Non-expert handling of the device could damage it. Consult your authorized Hisense dealer for help. It may cause fire, electric shock and breakdown.
- Do not drop, knock or shake it. Rough handling can break internal circuit boards.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean it.
- When lightning, do not touch power plug or phone line, It may cause an electric shock.
- Do not install the unit in places where there is direct sunlight.
- Before using plug, check with home power voltage. Inaccurate power voltage may cause fire and damage.
- Do not touch the plug with wet hands. When disconnecting the power cord of any accessory, grasp and pull the plug, not the cord. Not doing so may cause fire or electric shock.
- Do not put heavy things on the power cord. Do not bend power cord too much. It may cause fire or electric shock.
- Please charge the battery fully when the handset is used the first time.
- Do not peel off battery. Do not short-circuit. You may get hurt or it may start fire by generation of heat or explosion.
- Do not throw and impact battery. Do not dispose of batteries by putting them in fire. They may explode.
- Use only Hisense-approved battery or adapter. If not, this may be a cause of explosion or short-circuit. Hisense does not bear responsibility for the danger.
- Please put it where is not available for children.
- The pictures quoted in this manual are only for reference.

This document describes the Hisense phone with CDMA digital service at 800 MHz.

**Note:** Your phone can work in networks with or without implementation of the RUIM mechanism. For those networks are not using RUIM to provide their service, their subscriber don't need to refer to the contents hereafter in this manual relating to RUIM.

## **SAR INFORMATION**

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types C677 (FCC ID: SARC677) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 1.106W/kg and when properly worn on the body is 0.761 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

## **Main Features**

### **WAP<sup>1</sup>**

You can use your phone to surf WAP pages with few settings, reading news, downloading pictures and enjoying other services provided by WAP websites.

### **BREW<sup>2</sup>**

You can download games, cartoon and other applications that run on BREW platform. These applications will expand your phone's ability beyond your imagination.

### **Wireless Modem**

When connected to a PC via a data cable, your phone can be used as a wireless modem, providing you unlimited access to Internet wherever is covered by CDMA1X network.

### **PIM<sup>3</sup>**

By help of Hisense's PIM software, you can manage phonebook, short messages stored in your phone, avoiding the tiresome input work on the phone's keypad, and copy downloaded pictures and ringtones to your phone, individualizing your phone.

### **Alarm**

Your phone's alarm can work when the phone is powered on, which helps you not to miss every important moment of your life.

### **Large Capacity Phonebook**

Up to 500 records can be stored in your phone's phonebook. Each record can have name, mobile number, home number, office number and other contents.

---

<sup>1</sup> WAP: Wireless Application Protocol

<sup>2</sup> BREW: Binary Radio Environment for Wireless

<sup>3</sup> PIM: Personal Information Management

## **Polyphonic Ringtones**

Polyphonic ringtones are wonderful to hear. Each time your phone rings, differentiating you from others surrounding you.

## Part Names and Functions

No.	Name	Function
1	Antenna	Transmit and receive RF signal.

**Note:**

In WAP service, the functions corresponding to Left/Right Soft keys and "OK" key are different from other parts, please refer to WAP service for details.

**LCD Display**

The following icons will displayed in Icon area

 Signal Strength Indicator	<p>Display the current network signal strength. The more bars show, the stronger the signal is.</p> <p>When there is no network signal available, it displays .</p>
 In Use Indicator	<p>Indicate that the phone is in a call or a call is incoming.</p> <p>Or indicate that data connection is activated for data services.</p>
 Message Waiting Indicator	Indicate that there are unread messages.
 Message Box Full Indicator	Indicate that message box is full.
 Etiquette Indicator	Indicate that your phone is in etiquette mode.
 Lock Indicator	Indicate that your phone has been locked.
 Alarm Indicator	Indicate that alarm clock has been set.
 Battery Level Indicator	Indicate the current battery volume level.
 Roam Indicator	Indicate that your phone is in roaming state.

 WAP Indicator	Indicate that your phone is in WAP connection.
 Interactive Message Indicator	Indicate that interactive message is received.

#### Date and Time

When the Time Display is enable, the date, week and time are displayed.

#### Soft key display

Display the functions corresponding to Left Soft key, Right Soft key and OK key

#### Note:

Roam Indicator only is displayed when international roam, and is not displayed when internal roam.

#### Date and time

When enabling the time display function, the date, week and time information are displayed.

#### Soft Key Labels

Display the corresponding functions for Left/Right Soft key and OK key.

The **Idle Display** is the standard display that you see when you are not on a call or using the menu.

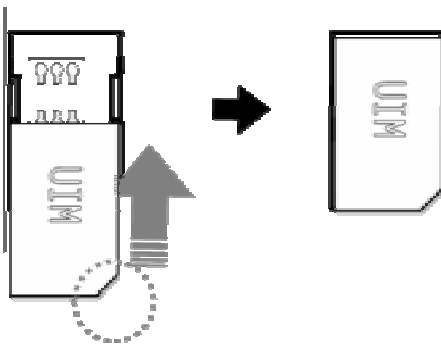

This document describes the Hisense phone with CDMA digital service at 800 MHz.

**Important:** Your phone can work in networks with or without implementation of the RUIM mechanism. For those networks are not using RUIM to provide their service, their subscriber don't need to refer to the contents hereafter in this manual relating to RUIM.

## *Installing the RUIM Card*

Your phone works with an RUIM card which you get from your service provider. Your RUIM card contains all your subscription information.

1. Power off the phone and uninstall the battery.
2. Insert RUIM card in with the metal contacts facing down and the cut corner aligned with that of the compartment.

3. Install the battery.

### **Note:**

1. If no RUIM card is installed, or there are errors in the installation, or your card is damaged, then your phone's LCD will display "Please insert R-UIM card" when it's powered on.
2. If your RUIM card is locked, your phone will display "unlock PIN". Please input PIN code, if you do not know the code; please contact your network service provider.
3. When installing RUIM, please keep it away from possible damage caused by static, scratch and bend, and put it where is not available for children.

## *Installing the Battery*

You must install and charge the battery to use your phone.

Insert the ridge at the bottom of the battery into the base of the phone, then push the battery down and snap it into place.

**Note:**

Your phone is designed to be used only with Hisense Original batteries and chargers. Use of other batteries or charger may cause damage to your phone and void the warranty.

### ***Charging the Battery***

New batteries are shipped partially charged. Before you can use your phone, you need to charge the battery, as indicated by the following instructions.

Some batteries perform best after several full charge/discharge cycles.

1. Plug the travel charger into your phone's connector port with the arrow facing up.
2. Plug the other end of the travel charger into the appropriate electrical outlet (100~230VAC). The phone's status lamp will light blue during charge.
3. When your phone indicates that the battery is fully charged (status lamp turns to flash blue), and then remove the travel charger.

**Note:**

1. Before charge, make sure the battery is installed in the phone.
2. The battery can discharge gradually even when your phone is powered off. If the battery is drained for a long time, the information stored in the phone could possibly be lost. So even you don't need to use your phone for a long period, you should charge the battery some times to keep it away from drained.
3. If the status lamp flashes in red, please remove your travel charger and insert it again. If this makes no effect, stop charge and send the charger for repair.

### ***Removing the Battery***

Make sure your phone is powered off so that you don't lose any unsaved information.

Press and hold the up flute of the battery cover and push down it to uninstall the battery cover, and then pull up the battery along the dual sides' latch to uninstall the battery.

## Battery Level Indicator

Your Phone is equipped with a Lithium Ion (Li-Ion) battery which can be recharged before completely drained. The battery provides approx 2 hours of continuous talk time or approx 5 days of continuous standby time.

Battery Level Indicator changes according to the battery's charge volume as below:

Full charge  
Partial charge  
Low charge  
Extremely low charge

If the charge continues to get low, the Indicator begins flashing. When the charge becomes drained, your phone gives an alert and the message of "Battery low. Please recharge or change battery" is displayed on the screen. Several minutes later your phone will alert again and then turn off automatically.

## Battery performance

- Local network conditions, phone's settings, game and music playing, data services and frequent operations can affect battery's standby time.
- The battery performance is also affected by charge state, temperature.

	880mAh (standard battery)
Standby time	90~125hours
Talking time*	100~180minutes

## Basic functions

### *Turning Your Phone On and Off*

1. Press and hold Power key for more than 3 seconds to turn on your phone.
2. The phone will display "power on animation" and search for network signals. When a network is found, the phone will enter Idle Display, from which you can send calls and do other operations.
3. If "Pin Code Check" (please refer to page \*\*) is set on, the phone will prompt you to enter password. If only you input proper password, the phone can enter idle display.
4. Press and hold Power Key for more than 2 seconds to turn off your phone.

### *Making a Call*

Your Phone offers a variety of ways to make a call, including Speed Dialing and dial from Recent Calls and phonebook.

#### **Making a Call Using the Keypad**

To make a call using the keypad from idle display:

Press **Numeric** keys to dial the phone number.

If you make a mistake, press **Left soft** key to delete last digit. Press and hold **Left Soft** key to delete all numbers.

If you want to dial extension number at one time, press **Right Soft** key to input "P" and follow with extension number.

You can dial up to 32 digits at one time.

Press **Send** key to make the call.

For the extension number, you need to press **Send** key again.

To end the call, press **Power** key.

#### **Making a Call Using Phonebook**

To dial directly from a Phonebook record from idle display:

Press **Left Soft** Key to enter phonebook menu, select Name find

Now search by name. Input the first letter, or letters of the name you are looking for and press OK, then a list of records beginning with those letters are displayed.

Or you can select Group find to search by group.

Or you can just press OK to view all records list and scroll through to find the record you want.

Enter the record to see detail. Select a phone number and press **Send** key to dial it.

If one record has more than one phone number stored and you dial it directly, the first number is selected and dialed out.

To end the call, press **Power** key.

#### **Making a Call with a Speed Dial**

Refer to Speed Dial (please refer to page \*\*) for more detail.

If you input one less than 2 digits (including 2) number and press **Send** key, then the entry stored in this location is selected and dialed out

## ***Answering a Call***

When you receive a call, your phone rings and/or vibrates and displays an incoming call message.

Press **Send** key to answer the call.

If any key answer set to on, you can answer the call by pressing any numeric key.

Press **Power** key to reject the incoming call.

## ***Read a Message***

When a new message is received, your phone will alert according to your settings and the message unread icon will be displayed. Press **Up** key to read it.

## ***Recent Calls***

### **Dialed Calls**

Press **Send key** to view dialed calls list from idle display.

Select the record you want with **Up/Down** keys and press **Send** key to dial it, or press **OK** key to view its detail.

### **Received Calls**

Press **Down key** to enter Recent Calls menu, and select the corresponding menu options to check the answered calls or missed calls.

Press **Up/Down** key to select the record, and press **send** key to dial it or **OK** key to check the details.

When viewing list of dialed/received/missed calls, press Right Soft key to pop up the submenu. You can do:

Add to phonebook	Add the current phone number to phone book
Add to rejection	Add the current phone number to rejection list
Send message	Enter message edit menu, and sent message to the current phone number.
Delete	Delete the current record
Delete all	Delete all of the incoming calls, missed calls and outgoing calls records.

## Entering Text

Multiple methods are provided making it easy for you to enter names, numbers, and messages on your phone.

### *Operation procedure of Text-Entry*

### *Choosing a Text-Entry Method*

The input methods provided are:

- |   |     |  |
|---|-----|--|
| 1 | ABC | Tap Method. Enter letters, numbers, and symbols by pressing a key one or more times. |
| 2 | EN  | Let the phone predict each word as you enter it.                                     |
| 3 | NUM | Enter numbers only.  |
| 4 | PUN | Enter punctuations and symbols only.   |

Whenever in a text-entry screen, press **Right Soft** key to display input method selecting window, then press the corresponding numeric key before each method to select it.

Press **#** key to enter punctuations and symbols in any text-entry method. Press the **numeric** key corresponding to the punctuation or symbols to select it, and use **Up/Down** key to scroll to other lines

### **Using ABC Method**

Press a numeric key one or more times to select a letter, number, or symbol shown in the following "Character Chart".

Character Chart

Use this chart as a guide for entering letters, numbers with the tap method.

0	0
1	@, 1
2	a b c (or A B C) 2
3	d e f (or D E F) 3
4	g h I (or G H I) 4
5	j k l (or J K l) 5
6	m n o (or M N O) 6

7	p q r s (or P Q R S) 7
8	t u v (or T U V) 8
9	w x y z (or W X Y Z) 9

- After a character is entered, the cursor stays at it. You can press **Down** Key to move to the next space or you can enter a character not on the same key directly.
- Press \* key to toggle between lowercase and uppercase.

For example, to input "china", press "2" three times, "4" twice, **Down** key once, "4" three times, "6" twice, "2" once.

### Using EN Method

This input method lets you enter a word using one keypress per letter. This software analyzes the combination of letters you have entered using an intuitive word database, and creates a suitable word automatically.

- Alternative words and letter combinations are shown at the bottom of the display. The word choices are updated with each keypress. Press **Up/Down** key for other choices.
- Press \* key to change the words to initial character capitalized, all uppercase characters, or all lowercase characters.
- Press OK key to enter the word at the cursor location. A space is automatically inserted after the word.

For example, to enter "Happy New Year":

Press 4, 2, 7 twice, 9, then \* **key** to capitalize "h", and then **OK** key to enter "Happy". Then press 6, 3, 9, \* key and **OK** key for "New". Then press 9, 3, 2, 7 \* key and **OK** key for "Year". Then press **Left Soft** key to delete the last added space.

#### Note:

The database of the predictive input software contains 20,000 most frequently used words. If the word you desired is not in the word choices, you can enter it by ABC Method.

### Using NUM Method

Press corresponding numeric key to enter the desired number.

### Using PUN Method

Entering Symbols and Punctuations

Press "#" key to display the symbols and punctuations, and press the numeric key corresponding to the symbol and punctuation to select it.

## SMS

Press OK key from idle display to view Main Menu, scroll to SMS and press OK to display SMS menu.

### *Inbox*

Select and press OK key to enter Inbox

The messages in the Inbox are displayed. Use Up/Down key to select the message, and then press OK key to view its detail. Use Up/Down key to scroll the texts.

When reading the message, you can:

Press Send key to dial the number directly.

Press OK key to reply a message. Please refer to "Create message" for detail.

Press Right Soft key to pop up the submenu. You can:

Delete msg: delete this message;

Delete selected msgs: delete the selected Inbox messages;

Delete all: delete all Inbox messages;

Forward: edit and forward this message;

Save message : save this message to inbox or UIM card;

Save number: save the message's phone number to phone, UIM card or existed.

### *Outbox*

Select and press OK key to enter Outbox.

The messages in the Outbox are listed. Use Up/Down key to select the message, and then press OK key to view its detail. Use Up/Down key to scroll the texts.

When reading the message, you can:

Press OK key to send this message.

Press Right Soft key to pop up the submenu. You can:

Delete msg: delete this message;

Delete selected msgs: delete the selected message in the inbox;

Delete all: delete all Outbox messages;

Forward: edit and forward this message;

Save message : save this message to inbox or UIM card;

### *Create a new message*

Select "Create message" and press OK key to enter "Edit" display.

When text is OK, press **OK** key..

You can enter phone numbers manually with **numeric** keys.

Or

Select number from the phonebook, outgoing call or incoming call.

When in "Send to" display, you can press **Right Soft** key to pop out submenu and do:

### **Multisend**

Let you send the message to up to ten recipients at one time.

When Multisend is selected, the caption changes to "Multisend 1". You can enter number manually or

from phonebook, then press **OK** key to select the next number.

When all numbers are entered, press **OK** key to show the multisend list. You can check and reedit the numbers here. When all is OK, press Right Soft key to send the message.

## **Save**

You can save the message to Outbox without sending it right now.

### **Note:**

If the message editing is interrupted by incoming calls, alarm clock, power keypress or power off, the entered texts will be saved temporarily. Next time you enter "Create message", the phone will ask you if the last edit should be continued. If you select "no", the last edit will be discarded.

You can edit messages on PC with Hisense PIM software tool (sold separately), and download them to your phone. Also you can upload the messages from phone to PC.

## ***Sent messages***

Select "Sent Messages" and press **OK** key to view sent messages list.

Select one message and press **OK** key to view its detail.

When viewing one message, you can press **OK** key to send it again.

Press Right Soft key to pop out submenu, you can:

Delete msg: delete the message

Delete selected message: delete the selected message in "Sent messages";

Delete all: delete all messages in "Sent messages";

Forward: edit and forward this message;

## ***Memory Status***

Select "Memory Status" and press **OK** key to enter.

The current message quantities and remaining capacity of Inbox, Outbox, Sent Msg, and UIM card are listed. Scroll with **Up/Down** keys.

## ***SMS Settings***

Select to enter SMS settings.

### **Select memory**

Let you select to store messages in Phone or in UIM card.

### **Validity Period**

Let you select from one hour/one day/one week/no limit as the validity period for your sent message.

Your message is sent to the network first, and then forwarded to the recipient if his phone can be accessed. Validity period is a time period, after which the network will delete the message automatically without sending it when the recipient's phone keeps inaccessible, for example powered off or with Inbox fulfilled.

### **Delivery Report**

Let you enable/disable Delivery report.

Delivery report is a confirming notification from the network when your message is sent to the recipient successfully.

**Note:**

This function depends on your local network and the functionality of your recipient's phone.

***Multisend Report***

Let you view the report of last multisend.

If one number is failed, it will be displayed before it. Press **OK** key to pop up a dialogue window to ask whether send it again.

Select "yes", and press **OK** key to send it again.

## Personal Information Management

Press OK key from idle display to view Main Menu, scroll to "PIM" and press **OK** to select it.

When in PIM menu, scroll to Alarm and press **OK** to select it.

### *Alarm clock*

The alarm list is displayed. Up to 6 alarms can be set. The set alarms can be only valid when the phone is powered on.

Scroll to one alarm and press OK to edit it.

#### **Set alarm time**

Move the prompt to the item (hour/minute) you want to edit with **Up/Down** keys and input alarm time directly with Numeric keys, press **OK** key to save the edit.

#### **Set alarm date**

You can set the alarm to function daily, weekly or on the specify date. When setting specify alarm date, use Up/Down keys.

Choose one alarm ringtone and press **OK** key to confirm it.

Choose one alarm state and press **OK** key to confirm it.

The alarm is set and saved.

#### **Note:**

The alarm volume is the same as the current ringtone volume. If the phone is set to vibration only, the alarm vibrates only.

When in alarm list display, scroll to one alarm and press **Right Soft** key to clear its settings directly. Or you can press **OK** key to select it and then press **Right Soft** key to clear its settings.

The set alarms can be only valid when the phone is powered on.

### *Scheduler*

When in PIM menu, scroll to Schedule and press OK to display Schedule menu.

#### **View By Day**

Select View by Date and press OK to display the schedule for current day.

Press **Up/Down** key to scroll to one time period, press **OK** key to add New Event.

Input the Event Name, then press **OK** key to do time setting. The event name can have up to 16 characters. The character numbers can be added is displayed on top left of the screen.

Press **Up/Down** key to move the prompt where you can change the time setting, input the start time and duration of the event directly with Numeric keys. Press **Up/Down** key to turn alarm on/off and change its lead time (1min/15min/30min). Press **OK** key to save your settings and continue to adding notes.

Input the note, press **OK** key to complete setting and return to View by Date display. The newly added Event Name will display in the list.

If the alarm is turned on and the event time is not in the past, one further step is needed to choose ring tone for the alarm.

You can scroll to one event and press **OK** key to view its detail.

When viewing the event, press **OK** key to edit the event, press **Right Soft** key to delete the event.

### View By Month

Select View by Month and press OK to display the calendar of current month. The days with events added are displayed in red. The current selected day is displayed in black. Use **Up/Down** keys to navigate the calendar by day/week, use **\***, **#** key to navigate by month. Select one day and press **OK** key to display its schedule.

### Add Event

Add a new event directly for current day's schedule. Refer to the operations described in View by Date.

### Options

Select to enter options. All of the settings in options are used as the common parameters during adding event, not used to set the concrete event.

**Set Work Hours:** you can set as the default view the list time of every day. Users can also add the time schedule beyond the default time mentioned above. You can also set the start time and end time of your schedule list here. Use Up/Down key to navigate, input time with Numeric keys directly.

**Auto Delete:** you can set your phone to delete the out-dated events automatically after 1 day/1 week/1 month or never.

**Default Alarm:** you can set the default lead time for event's alarm here by 1 min/15 min/30 min or No Alarm.

### Notepad

When in PIM menu, scroll to Notepad and press OK to display your notes list where you can store up to 6 notes here. The non-blank note appears with the beginning of contents, or only "note" appears. You can press **Right Soft** key to delete one selected note directly.

Select one note and press OK to view it. Press OK again to edit it. Press **Right soft** key to delete it.

### Calculator

When in PIM menu, scroll to Calculator and press OK to do arithmetic.

**Up/Down** keys are responding to "+", "-", "\*", "/" respectively. Use **Right Soft** key to set number positive or negative. Use "\*" key to input decimal. Press **OK** key to generate result. Use "#" key to clear all. Press **Left soft** key to return to PIM menu.

### Stopwatch
