# Getting ready for use
## Part name and function

|   | Name | Function |
|---|------|----------|
| 1 | Power key | When powered on press to darken or lighten the screen or hold to pop up option menu. When powered off hold to turn on the phone. |

| 2 | Menu key | Press to present a main menu. |
|---|---|---|
| 3 | Home key | Press to return to home screen. |
| 4 | Return key | Return to previous menu. |
| 5 | Fast search key | Enter Google search interface. |
| 6 | Camera | Take pictures. |
| 7 | Volume keys | Press to accommodate the volume and start up silence mode when there is an incoming call. |
| 8 | Headset jack | Insert headset. |
| 9 | Charge/USB Port | Connect USB line. |

## Inserting the UIM card

Your phone must work with a card provided by your service provider. Your card contains all your subscription information.

Insert UIM card with the metal contacts facing down and the cut corner aligned with that of the slot;

2

Notes:
1.  If no card is installed, or there are errors in the insertion, or your card is damaged, the string of "No service" will display on the screen after your phone is powered on.
2.  If your card is PIN-locked your phone will display "unlock PIN". You must enter PIN before the phone can start working. Please contact your network service provider if you need.
3.  When inserting card, please keep it away from possible damage caused by static, scratch and bend, and put it where is not available for children.

## Inserting SD card

Insert SD card with the metal contacts facing down and the cut corner aligned with that of the slot;

## Installing the battery

You must install and charge the battery to use your phone. Insert the ridge at the top of the battery into the base of the phone, make sure to touch the

3

metal contact on the phone, then push the battery down and snap it into place.

Note:

Your phone is designed to be used only with original batteries and chargers. Use of other batteries or chargers may cause damage to your phone and the warranty will be void.

## Removing the battery

Make sure your phone is powered off to avoid the important information getting lost.

Hold battery bottom and remove the battery from the phone.

## Charging the battery

New batteries are shipped partially charged. Before you can use your phone, you need to charge the battery. Some batteries will have best performance after several full charge/ discharge cycles.

1. Connect data cable and charger, plug one end into your phone's data port.
2. Plug the other end of the charger into the appropriate electrical

outlet (100~240V AC).
3. When your phone indicates that the battery is fully charged, remove the charger.

**Notes:**
1. Before charge, make sure the battery is installed in the phone.
2. The battery can discharge gradually even when your phone is powered off. If the battery is drained for a long time, the information stored in the phone could possibly be lost. So even you don't need to use your phone for a long period, you should charge the battery some times to keep it away from drained.
3. You need longer charging period with the lower voltage.
4. You need longer time as operation as charging.
5. The nomal charge temperature is during 0℃-40℃.

## Battery performance

|  | 1200mAh (standard battery) |
| --- | --- |
| Standby time* | 100hours |

| Talk time* | 200 minutes |
|---|---|

- Many conditions can affect battery's standby time, such as local network conditions, phone's settings, frequent operations, using data services, etc.
- The battery performance is also affected by charge state and temperature.

6

# Basic operations

## Turning your phone on and off

Turn on the phone: Press and hold Power key for more than 3 seconds to turn on your phone.

Turn off the phone: Press and hold Power key to pop up option menu, select "power off". If it is powered off you can not receive, make a call or do other operations.

## Videos

View and play the video on the SD card.

# Safety information

For safety, only an approved adapter can be used. It does not bear responsibility for any faults that may arise due to non-conformation to this guide. For example:

Do not, in any way, cause a short-circuit. It may start a fire or the phone may explode causing injury.

Do not create a sudden impact on the battery by throwing it.

Do not dispose off batteries by putting them in a fire. They may explode or catch fire due to the electrolyte within.

Caution

Do not use the phone with a wrong battery.

Avoid using the phone in high temperature or humidity. Avoid spilling any liquid on this phone. If the phone gets wet, Switch off phone and turn off AC power supply.

Keep the phone dry. Submersion, humidity, and liquids containing minerals may corrode internal electronic circuits.

Do not store or use the phone in dusty or dirty areas as this can damage the moving parts.

Do not store the phone in hot/ cold areas.

Do not attempt to open it. Non-expert handling of the phone could damage it. Consult your authorized dealer for assistance.

Do not drop, knock or shake the phone. Rough handling may break the internal circuit boards.

Do not use harsh chemicals, cleaning solvents or strong detergents to clean the phone. Wipe it with a soft cloth that has been slightly dampened in a mild soap and water solution.

Do not paint the phone. Paint can clog the phone's moving parts and prevent proper function.

During lightning, do not touch the power plug or the phone line. It may result in an electric shock or death.

Do not install the phone under direct sunlight or on an uneven surface. Before using the plug, check the available power voltage. Inaccurate power voltage may cause fire and damage.

## Accessories List

- Battery
- AC Charger
- USB cable
- Earphone
- User Manual
- Warranty card

# RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types E860 (FCC ID: SARHISENSEE860) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.428W/kg and when properly worn on the body is 0.538 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.0cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help
