RE: UNIWILL COMPUTER CORP.

FCC ID: SAZ-2200BG245

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) From the labeling provided, it appears that the device is being certified as a whole computer. From the EMC test photographs and modular approval letter it appears the device is being subjected to a Limited Modular Approval. If a Limited Modular Approval is desired, then the module itself needs to be relabeled with the new FCC ID, and the outside of the computer would be labeled with "Contains TX: SAZ-2200BG245". Please clarify and correct and necessary exhibits as necessary.
- 2) The users manual appears to be the final users manual. If this is an integrator manual, everything is fine. If this is an end users manual, the information starting with "This device is intended only for OEM integrators" on B-2 and the information on the first half of B-3 should not be provided to the user. Please clarify and/or correct as necessary. If this is a modular approval, please provide an integrators manual. If this is being approved as a whole device (laptop), please provide the end users manual.
- 3) FYI...Declaration of Conformity information in the manual is lacking information. All the following information should be placed on a single page in the users manual for the end user.

COMPLIANCE INFORMATION FOR DoC AUTHORIZATIONS (47CFR 2.1077)

If a product is tested and authorized under a Declaration of Conformity, a compliance information statement shall be supplied with the product at the time of marketing or importation, containing the following information on a single page (as a separate sheet or in the users manual):

- (1) Identification of the product, i.e. name and model number.
- (2) A statement similar to that contained in Section 15.19(a)(3) that the product complies with Part 15 of the regulations.
- (3) The identification, by name, address and telephone number, of the responsible party. The responsible party is defined as either the manufacturer, or if the equipment is imported, the importer. The responsible party for a Declaration of Conformity must be located within the United States.

--- Continued on Next Page ---

4) Proposed Grant Notes:

Output power is Conducted. Limited Modular Approval. The mini-PCI Card is to be installed in the specific notebook computer(s) shown in this filing only by the grantee or their designated OEM integrator – user installation is prohibited. Installation of this device into other host products requires the submission of a Class II permissive change application containing data demonstrating compliance for SAR, spurious emissions, or new application if appropriate. Compliance of this device in all final host configurations is the responsibility of the Grantee. The antenna(s) used for this transmitter must not be co-located or operate in conjunction with any other antenna or transmitter. The SAR data in this filing is applicable to demonstrate compliance for the final host product(s) only as shown in this filing. End users must be provided with operating instructions for satisfying RF exposure compliance requirements. The highest SAR values reported are: Body; 0.64 W/kg.
