---	---	--

The product meets the exception to place the unit label on the interior per guidance published (784748 D01 Labelling Part 15 & 18 Guidelines v08, July 11, 2014) by:

- ✓ The device is handheld (notebook computers are considered as handheld);
- ✓ The FCC identifier is visible at the time of purchase. Marketing the device without the battery installed when the label is in the battery compartment is acceptable. The FCC ID on the box, or additional documentation directing the user where to find the FCC label, also satisfies this requirement;
- ✓ The user accessible area must not require any special tools for access, and the FCC label must not be placed on a removable part;
- ✓ The FCC ID, Model Number, or FCC logo must be on the label and must meet all general labelling requirements or policies that apply for Certification, Verification or DoC.
