### Manuals and Guides

To reduce our use of paper, we have moved our product documentation online. For the latest Sonos product guides, please go to [www.sonos.com/guides](http://www.sonos.com/guides).

### Technical Support

- **Web site**
  - Visit our Web site at [www.sonos.com/support](http://www.sonos.com/support). There you can visit our Forums, browse our Frequently Asked Questions (FAQ) pages, or request assistance.
- **Email**
  - [Support@sonos.com](mailto:Support@sonos.com)
- **Telephone**
  - Please visit [www.sonos.com/support](http://www.sonos.com/support) to find the correct telephone number for your country.

## **FCC Compliance Statement:**

### **USA**

This device complies with Part 15 of the FCC Rules using limits for a Class B digital device. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- All Sonos devices have in-products antennas. Users cannot reorient or relocate the receiving antenna without modifying the product
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

**Caution:** Modifications not expressly approved by the manufacturer may void the user's authority to operate the equipment under FCC rules.

The device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

### **RF Exposure Requirements**

To comply with FCC and Industry Canada exposure essential requirements, a minimum separation distance of 20cm (8 inches) is required between the equipment and the body of the user or nearby persons.
