Subject: Sonos Inc., FCC ID: SBVZP001, Assessment NO.: AN05T5033, Notice#1

Question #1: Please submit the following exhibits: Block diagram, Operational Description, Schematics.

ANS 1 Documents have been submitted to the website

Question #2 : This is a 802.11g device, by default, with 11b capability as well. The test report shows the EUT was tested with 802.11g mode only. Based upon FCC QA, both modes need to be tested, please submit additional test data for 11b mode.

ANS 2 This product by virtue of Sonos software does not have capability of operating on 802.11b, it can only operate on 802.11g. It does not associate with any other WiFi devices except for similar Sonos products also limited to 802.11g operation by virtue of software.

Question # 3 : The test report (page 6) indicates "The EUT is a modified version of FCC ID: SBVZP001", which is not true. It might be "SBVZP000" instead. Please confirm.

ANS 3 The report contains a typo, the correct reference should have been SBVZP000

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
