Hello,

There is no extended battery, so I revised the Users Manual.

Attached the revised Manual.

Best regards,  
K.T. LEE

KT, I have reviewed the above referenced TCB Certification Application and need the following item corrected before the review can be completed:

The Users manual indicates that this phone has Standard Type battery and a 'Large Capacity' battery. The SAR report only documents compliance of RF Exposure for a Standard battery. If there is an extended battery, please provide SAR RF Exposure compliance information. If there is no extended battery, please revise the Users Manual.

Please provide this information directly to me.

Best regards,  
Chris Harvey
