Dear Mrs. Marianne Bosley,

Hello,

I was informed our customer(VK Corp.) about the essential particulars about label location, and he confirmed it.

Best Regards,  
K.T. LEE

Hello,

Ok, but the rule is that the label must be present to the purchaser. So if he is going to have the battery removed and the compartment open at time of purchase, please just send me an email confirming this.

Thanks.

Marianne

Hello,

Thanks for your help.

1. attached the label and location.
2. He said that the label of Phone generally is located undereath a back door of the phone. and model name of product is visible to front cover.

Best Regards,  
K.T. LEE

Hello,

Thanks for your reply. There are still two issues:

1. label - the label you submitted had FCC ID: SBWVK5300US (all other documentation has SBWVK530US). Please correct label (assuming the 530US is correct).
2. location - It appears to be located underneath a back door of the phone. The rules state the label must be visible to the purchaser. Please explain.

Any questions, let me know.

Marianne

Hello,

Thanks for your help.

1-2. attached the label and location.

3. The EUT has not particular control to be max.power. so we just used GSM communication equipment to be max. power.
4. 15.21 statement -- attached the revised manual (page 6 of 77)
5. 15.105 statement -- attached the revised manual (last page)
6. attached the 15.19 statement.

Best regards,

K.T. LEE

Hello,

There are a couple of admin issues for this project:

1. label - did not see one with the docs
2. label location - did not see one with the docs
3. tune up -did not see one with the docs
4. 15.21 statement - could not find in manual; let me know where they are.
5. 15.105 statement - could not find in manual. Let me know where it is.
6. 15.19 statement - I saw it in the manual, however if the device is large enough, it is supposed to be on the device. If you are requesting it specifically to be in the manual (due to size), I need a letter requesting it

Any questions, let me know.

Regards,

Marianne
