The intent of this application is for a Class II permissive change pursuant to 47 CFR 2.1043(b)(2). The product with the changes stated herein will not be marketed prior to acknowledgement by the Commission that the change is acceptable. The device was completely retested to ensure compliance with the limits set forth in 47 CFR 15.249. The device tested consisted of the **Evermore Systems Smart Swing Wireless Golf Club**. The changes made are as follows:

1. The 2.4 GHz microstrip antenna was moved to a location on the main pcb. The original location for the microstrip antenna was an adjoining piece that lay horizontally to the main pcb.

The results of the retest show that the device met all applicable criteria for certification.
