RE: Evermore Systems

FCC ID: SYBSSL1 or SBYSSL1

After a review of the submitted information, I have a few comments on the above referenced Application.

Administrative Issues:

- 1) The Grantee code given on the 731 form and test report appears incorrect and does not match the information given on the FCC site. Please confirm the correct grantee code in all affected exhibits. It appears the grantee code may be SBY.
- 2) The 731 states a TX frequency of 2431, while the operational description states 2432. Which is correct? Please correct all affected exhibits for the correct frequency.
- 3) Since this device connects to a computer (contains a USB interface) and used for residential customers, the device is also considered a class B PC peripheral subject to either a) DoC (note that DoC authorizations require a lab meeting the requirement of 2.948(d)) or alternatively b) Certification (requiring FCC or TCB review) for this part of the device. Note that the labeling and manual information are different depending on which process was used for approval of the PC Peripheral device (DoC / Certification). Currently the device does not appear include proper labeling (15.19) or manual information (2.1077 - see below) for a DoC authorization. Please explain which route is being used for compliance.

If the device is being subject to Certification for the PC portion, Note that certification would be considered as a composite application and 2 certificates (one for the TX, one for the PC peripheral portion) would be issued. Additional information may be required and there are additional review costs associated with this additional certification. Note that the current test photographs do not support proper test positioning for PC peripherals devices according to ANSI C63.4.

If the device is to be subject to a DoC, please confirm that the appropriately fully configured system according to ANSI C63.4 has been tested. Note the device and manual do not include the necessary information for a DoC.

FYI:

COMPLIANCE INFORMATION FOR DoC AUTHORIZATIONS (47CFR 2.1077)

If a product is tested and authorized under a Declaration of Conformity, a compliance information statement shall be supplied with the product at the time of marketing or importation, containing the following information on a single page:

- (1) Identification of the product, i.e. name and model number.
- (2) A statement similar to that contained in Section 15.19(a)(3) that the product complies with Part 15 of the regulations.
- (3) The identification, by name, address and telephone number, of the responsible party. The responsible party is defined as either the manufacturer, or if the equipment is imported, the importer. The responsible party for a Declaration of Conformity must be located within the United States.

- 4) The users manual appears to be missing the information required by 15.105. Please provide an updated version.
- 5) The highest reading on page 16 appears to calculate out to 0.0 dB margin. Please explain.

Timothy R. Johnson
Examining Engineer
