CARE AND MAINTENANCE

Your Nordic ID Merlin contains delicate electronic parts. Therefore it is vulnerable to environmental factors such as dirt, extreme temperatures, humidity and mechanical stress. Treat your Merlin with care. The following hints help you to preserve your device's functionality and longevity.

CLEANING

- The device can be wiped clean with a damp, non-abrasive, clean, lint-free cloth.
- Do not use harsh chemicals, strong detergents, or abrasive cleaners to clean the device.

HANDLING

- Avoid dropping the Merlin, or bumping it against other objects. Hard impacts can damage the device. Note that damages caused by careless handling are not covered by the warranty.
- The touch sensitive colour display, i.e. the touch screen, is vulnerable to mechanical stress. Do not use sharp objects or excess force on the touch screen.
- Avoid storing the Merlin in dirty, damp, hot or cold conditions. Harsh environmental factors can shorten the life of electronic components, damage batteries and warp or fracture plastics or other mechanical parts.
- When the Merlin is moved from a cold environment to a warm environment, condensation may lead to a short circuit inside the device. It is advisable to allow the device to acclimatize for several

hours, after being brought in from the cold, before powering up.

- Try to keep your Merlin dry. Wipe spilled liquids immediately with a dry, non-abrasive, clean, lint-free cloth. If the inside gets wet, open the battery cover and remove the battery to allow the inside to dry. You may power up the device again once it has dried.
- Do not open the device case. Opening the case voids the warranty.

SAFETY PRECAUTIONS

LASER

Nordic ID Merlin mobile computers, equipped with 1D laser scanner, are classified as Class 2 Laser products. The laser scanner uses the low power laser diode emitting visible light beam of 650nm wavelength with 1mW power. As with any very bright light source, such as the sun, the user should avoid staring directly into the light beam. Momentary exposure to a Class 2 laser is not known to be harmful.

The Nordic ID Merlin fulfills the regulatory requirements as follows:
Complies with 21CFR1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007.
IEC/EN 60825-1:2007

BATTERY

Use only Nordic ID BAR00008 Lithium Ion rechargeable batteries designed for Nordic ID Merlin. Using any other battery type or model involves the risk of battery explosion. Do not short circuit the battery's electrical contacts.
Do not expose the battery to direct sunlight or other heat sources.
Dispose of the battery according to the instructions at the end of its useful life.

POWER SUPPLY

Check that the power supply in the box is one of the following approved power supply models, and that it is suitable for your ac mains supply:

Manufacturer	Model
EDAC	EA10402M-240
Sino American	SA130B-24U
Ten Pao	S040EM2400167
Cincon	TRG30R240V

Use only the approved power supply for charging the rechargeable batteries of Nordic ID Merlin; do not use the power supply for any other purposes.
Use the power supply indoors at normal room temperatures.

MEDICAL DEVICES

Operation of any radio transmitting wireless equipment, including the Merlin, may interfere with the functionality of inadequately protected medical devices. To avoid potential interference, a minimum separation of 20 centimetres (8 inches) between a wireless device and an implanted medical device, such as a pacemaker, hearing aid, or cardioverter-defibrillator, is recommended by the manufacturers of medical devices. Consult a physician or the manufacturer of the medical device if necessary.

POTENTIALLY EXPLOSIVE ENVIRONMENTS

Switch off your device when in area with potentially explosive atmosphere. Sparks in such areas could cause fire or an explosion. Potentially explosive environment include areas where the air contains chemicals or particles such as dust or other powders. Potentially explosive areas are often, but not necessarily always, clearly marked. Obey all signs and instructions.

RF EXPOSURE

This hand-held device complies with EU, FCC and IC's RF radiation exposure limits set forth for an uncontrolled environment under the following condition: The device shall be used in such way that at least a distance of 20 centimeters is maintained between the Merlin device's antennas and the body of the user and nearby persons.

To hold the Merlin device in your hand in a safe way, see the page "READING RF TAGS".

NATIONAL RESTRICTIONS IN THE EUROPEAN UNION

When the Merlin device incorporates an optional 2.4 GHz wideband transmission system (transceiver), it imposes some restrictions on the use of its 2.4 GHz WLAN connectivity in France, Italy, and Latvia.

In Italy the end-user should apply for a license at the national spectrum authorities when using the outdoor WLAN set-ups and/or supplying public WLAN access to

telecommunications and/or network services.

The outdoor WLAN set-ups may not be used in France, and in some areas the RF output power may be limited to 10 mW EIRP (for detailed information, contact the national spectrum authority in France).

In Latvia the outdoor usage of the 2.4 GHz band requires an authorization from the Electronic Communications Office.

France Pour la bande 2,4 GHz, la puissance est limitée à 10 mW en p.i.r.e. pour les équipements utilisés en extérieur dans la bande 2454 - 2483,5 MHz. Il n'y a pas de restrictions pour des utilisations dans d'autres parties de la bande 2,4 GHz. Consultez <http://www.arcep.fr/> pour de plus amples détails.

Italy Questo prodotto è conforme alla specifiche di Interfaccia Radio Nazionali e rispetta il Piano Nazionale di ripartizione delle frequenze in Italia. Se non viene installato all'interno del proprio fondo, l'utilizzo di prodotti Wireless LAN richiede una "Autorizzazione Generale". Consultare <http://www.comunicazioni.it/it/> per maggiori dettagli.
