Re: FCC ID: SDBIDTB003

To Whom It May Concern:

The following application is submitted on behalf of our client, Sensus Metering Systems, Inc., for evaluation of their model IDTB003 for certification under FCC Part 24 Subpart D and Part 101 Subpart C.

The IDTB003 is a stand-alone module consisting of a single printed circuit board which is designed to be integrated into specific host devices. The IDTB003 monitors meter reading and diagnostic information. The device communicates via the Sensus USA Inc. fixed wireless telemetry network to provide electric meter readings and diagnostic data from the meter to the utility provider via a two-way radio link.

The IDTB003 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Even though some exhibits refer to a Zigbee module, the IDTB003 is not co-located with this module for this filing. In the future, the IDTB003 will be co-located with the Zigbee module and a C2PC will be filed at that time.

Sincerely,

A handwritten signature in black ink that reads "R. Sam Wismer". The signature is written in a cursive, flowing style.
