

Sensus Non-Disclosure Memorandum

November 28, 2012

Sensus OEMs:

This memorandum serves as an additional agreement between Sensus and its OEMs stating that the OEMs will use the Sensus SLC200 module (See Appendix 1) in accordance with the FCC rules on modular approved devices. The Sensus SLC200 Transceiver is professionally installed inside various third party lighting devices. The module label will be located on the secondary side of the PCB and will display both the FCC and IC IDs of the SLC200 module. Confidentiality of the internal photos and the technical manual is being requested because this is a non-consumer device which is not accessible by the general public, professionally installed, and is only serviceable by Sensus, or designated technicians.

Please feel free to contact me directly should there be any questions regarding this matter.

Respectfully,

Al Servais | Reliability and Compliance Program Manager
