Re: FCC ID: SDBTGB001HP

To Whom It May Concern:

The following application is submitted on behalf of our client, Sensus Metering Systems, Inc., for evaluation of their model TGB001HP for a Class II Permissive Change.

The TGB001HP is a 900 MHz transceiver with variable RF power output. The purpose of this Class II Permissive Change is to remove the frequency bands of operation under FCC CFR Part 90 and include additional frequency bands of operation under FCC Part 101, additional emission designators, and to show compliance under low power operation. There are no hardware or maximum RF output power changes on the unit.

The FCC ID: SDBTGB001HP was tested in full to the requirements of FCC Part 24 Subpart D and FCC Part 101 Subpart J, to cover the whole frequency range and both low and high power modes of operation of the device. The FCC ID: SDBTGB001HP was found to be in compliance.

Sincerely,
