Re: FCC ID: SDBVGB

To Whom It May Concern:

The following application is submitted on behalf of our client Sensus Metering Systems, Inc. for evaluation of their models 4500-MAS, 4500-PCS for Certification under CFR 47 Part 24 Subpart D, and Part 101.

The 4500-MAS and 4500-PCS are Vehicle Gateway Base stations (VGB) used in the utility industry for mobile meter reading applications. The VGB Models 4500-MAS and 4500-PCS are electrically identical in all aspects with the exception of a diplexer used in the receiver operation. The diplexer allows the 4500-MAS unit to receive in the range 932 - 932.5 MHz and the 4500-PCS to receive in the range 901 – 902 MHz.

The VGB models 4500-MAS and 4500-PCS were tested in full to the requirements of the aforementioned rules and were found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads "R. Sam Wismer". The signature is written in a cursive, flowing style.
