

Dear Mr. Leimer,

I would like to answer your letter (Correspondence Reference Number: 27724). Certainly, I saw all exhibits that must be submitted with application. But, as usually, I sent you Test Report only, because it include almost all exhibits: block diagram, external and internal photos, operational description, test setup etc. There are no ID labels and location info in our report. I received you request to submit a drawing of the ID label (see the letter with correspondence reference number 27446). It was send to FCC immediately.

So, do you think that I must to send to FCC all exhibits separately or Test Report (with it's contents) is enough?

Thank you very much and I'm waiting for your answer.

Sincerely,

Albert Herzenshtein

EMC engineer, Standard Institution of Israel.
