Healthy and Safety Information

Exposure to Radio Frequency (RF) Signals

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) for the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on the safety standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies.

The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless phones employs a unit of measurement known as Specific Absorption Rate (SAR). The SAR limit set by the FCC is 1.6 W/kg.¹

SAR tests are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the phone.

Before a new model phone is available for sale to the public, it must be tested and certified by the FCC to insure that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on body) as required by the FCC for each model. While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found on the FCC website (<http://www.fcc.gov/oet/fccid>) after searching the FCC ID printed in the label on the phone.

The highest SAR value for this model phone when tested for use at the ear is 1.05 W/kg, and when worn on the body, as described in this user guide, is 0.67 W/kg.

¹ In the U.S. and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

For Body Operation

To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories that maintain a 1.5 cm separation distance between the user's body and the back of the phone, including the antenna, whether extended or retracted. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

For more information concerning exposure to radio frequency signals, see the following websites:

Federal Communications Commission (FCC) <http://www.fcc.gov/oet/rfsafety>

Cellular Telecommunications Industry Association (CTIA) <http://www.wow-com.com>

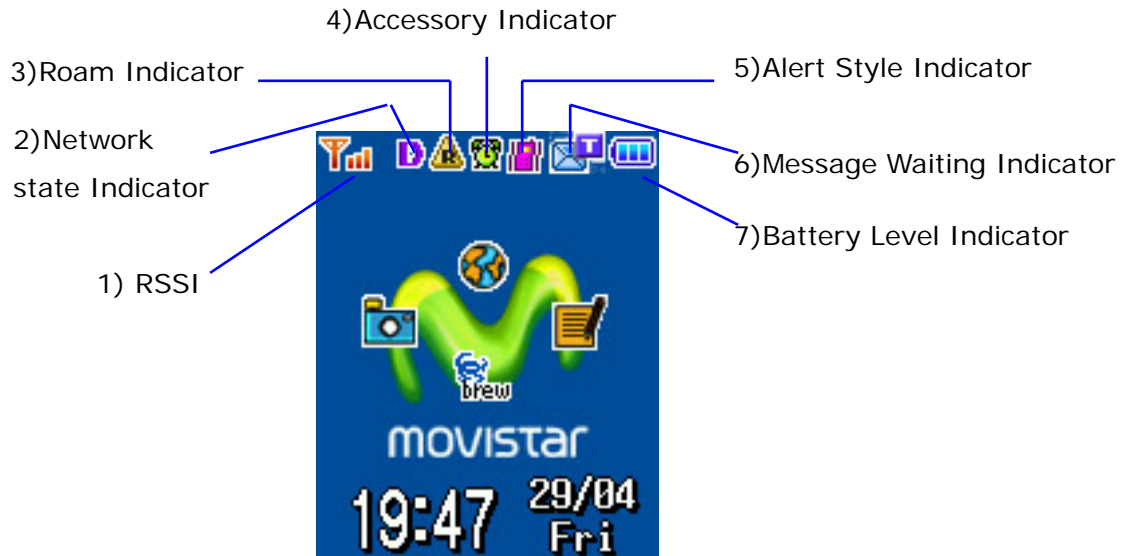

U.S. Food and Drug Administration (FDA) <http://www.fda.gov/cdrh/consumer>

World Health Organization (WHO) <http://www.who.int/peh-emf/en>

.

Description for indicators on screen and Key pad

Idle screen

- 1) RSSI:  6 level indicator for the radio field strength
- 2) Network State Indicator
 - IDEL State : Indicates whether you are receiving a digital or analog signal
 -  : Digital signal,  : CDMA 1x signal
 - Call state
 -  in call state indicator,  out of call area
- 3) Wireless data communication type indicator : Shows data transfer method
 -  : Packet method,  : Circuit method
- 4) Roam indicator () : Displays when phone uses a network outside the home network.
- 5) Alarm :  a indicator meaning that alarm or morning call is set to ring
- 6) Vibration :  a indicator meaning that a vibration mode is set
- 7) Message () : Appears when a new text message is received. Other indicators can include;

: Photo mail,

: Web Message,

: Text and Voice message,

: Voice message

8) Secure Web(): a indicator meaning that the phone is connecting with secure page in wireless internet network.

Key Layout

Getting Started

Turning On/Off the Phone

1. Open the folder
2. Press & hold the 'END' key until the phone switches on.
3. If necessary, enter your 4-digit unlock code and press 'OK' key to unlock the phone
Note: The display language is preset to Spanish at the factory. To change the language, use the 'setting' menu option in the 'Other function' menu
4. When you wish to turn off the phone, Press & hold the 'END' key until the power-off animation is started

Making a call

When the idle screen is displayed, enter the area code and phone number and press the 'SEND' key. When you have finished your call, close the flip or briefly press the 'END' key.

Making a call using the Contacts

You can store phone numbers that you use regularly in the phone's memory, called Contacts. Once you have stored phone numbers in Contacts, you can dial them simply by selecting the name or phone number you want to call.

Making a call using the speed dialing number

Memory locations 0 through 800 are special one-touch locations. You can dial the phone numbers stored in the Contacts memory from 0 through 800 simply by pressing one button.

Making a call using the call records

The call records stores the last 60 numbers dialed. To recall any of these numbers, proceed as follows.

- (1) If there are any characters on the display, clear the display by holding down the 'CLR' key for more than one second.
- (2) Press 'SEND' key. The list of the calls is displayed.
- (3) Use the 'UP', 'DOWN' key of Navigation keys to scroll through the numbers until you select the required number.
- (4) Press 'SEND' key to dial the number displayed.

[note] Three Way Call

- (1) Enter a number you wish to call and press 'SEND'.

(2) Once you have established the connection, dial the second caller's phone number and press 'SEND'.

(3) When you are connected to the second caller, press 'SEND' once more to begin your three-way call.

Answering a call

When somebody calls you, the phone rings/or vibrates and the phone animation in the middle of the screen flashes. If the caller can be identified, the caller's phone number (or name if stored in your Contacts) is displayed. If the caller cannot be identified, only the phone animation flashes.

1. If open the flip, answer the incoming call.

During a call, if you want to adjust the earpiece volume, use the volume keys on the left side of the phone.

Press the key to increase and the key to decrease the volume.

2. End the call by closing the phone or pressing the 'END' key.

Note: You can answer a call while using the Contacts or menu features.

When the phone rings/or vibrates as someone call, you can make the ring/or vibration silence by pressing the 'END' key.

Adjusting Volume

During a call, if you want to adjust the earpiece volume, use the volume keys on the left side of the phone

Press the 'up()' key to increase and the 'down()' key to decrease the volume

In the idle mode with the folder open, you can adjust the key volume using these keys.

Viewing Missed Calls

When you are unable to answer a call for any reason, you can find out who called you, provided that this service is available. In this way, you can call the person back, if necessary. The number of missed calls is displayed on the idle screen immediately after the call was missed.

To view the missed call immediately, proceed as follows.

(1) If the phone is closed, open the flip cover.

(2) Press the 'SEND' key.

The number corresponding to the most recent missed call is displayed.

(3) To scroll through the missed calls, Press the 'up' or 'down' key

- (4) To call the number displayed, Press the 'SEND' key
- (5) If necessary, to edit or delete a missed call number, select 'MENU' key

Quickly Switching to the Manner mode

Manner mode is convenient when you wish to prevent the phone from ringing when it is inappropriate.

In idle mode, to switch your phone quickly to manner mode, simply press and hold the  key.

Until the 'Manner Mode Activated' message and vibration icon() are displayed. In the manner mode, your phone changes the sound settings as follows.

Option	New setting
ALERT TYPE	Vibration
KEYPAD TONE	OFF
SMS Tone	Vibration

To exit manner mode and reactivate the previous sound settings, press and hold the  key again until 'Manner Mode Deactivated' message appears. The vibration icon is no longer displayed.

Entering Text

When using your phone, you will often need to enter text. For example, when storing a name in the Contacts, creating your personal greeting or scheduling events in your calendar. You can enter alphanumeric characters by using your phone's keypad.

Your phone has the following text input modes;

- eZi Text Mode
This mode allows you to enter words with only one keystroke per letter. The eZi Text mode automatically compares your keystrokes with an internal linguistic dictionary to determine the correct word, thus requiring far fewer keystrokes than the traditional alphabet modes.
- Alphabet Mode
These modes allow you to enter letters by pressing the key labeled with the required letter once, twice, three or four times until the letter displays.
- Symbol Mode
These modes allow you to enter symbols, such as punctuation marks.
- Number Mode

These modes allow you to enter numbers

- Canned MSG Mode

These modes allow you to enter the canned message.

Character Chart

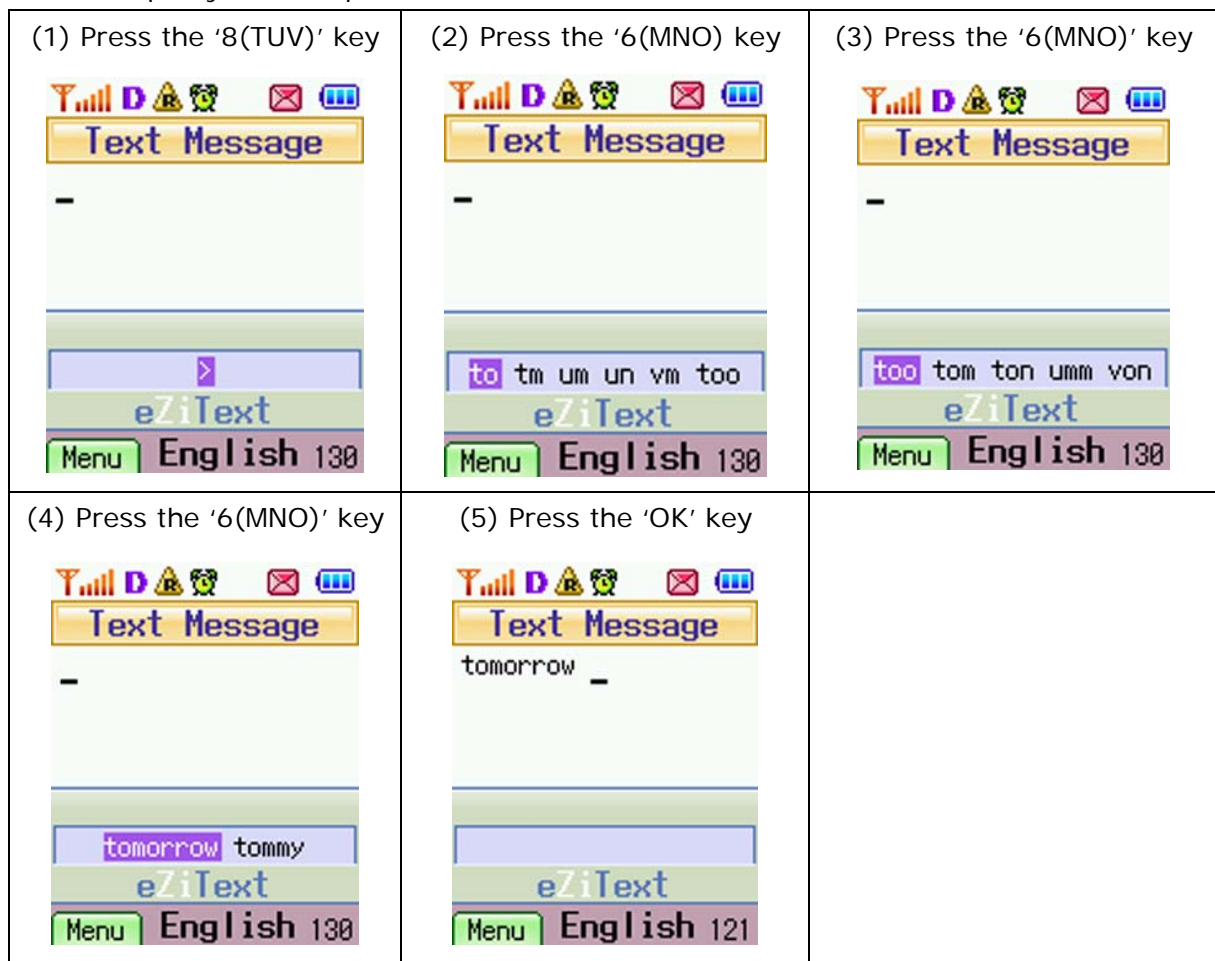

Key	Upper Case	Lower Case
0	0	0
1	1 . @ ? ! - , & : ‘	
2	A B C 2 Á Ã Â À Ç	a b c 2 á ã â à ç
3	D E F 3 É Ê	d e f 3 é ê
4	G H I 4 Í	g h i 4 í
5	J K L 5	j k l 5
6	M N O 6 Ó Ô Õ Ñ	m n o 6 ó õ ô ñ
7	P Q R S 7	p q r s 7
8	T U V 8 Ú Û	t u v 8 ú û
9	W X Y Z 9	w x y z 9
*	Space	
#	Switch on the mode such as ‘ABC’ or ‘Abc’ or ‘abc’	

1. Using the eZi Text Mode

The eZi predictive text input mode allows you to key in any character using single keystroke.

- (1) When you are in the eZi predictive text mode, start entering a word by pressing keys ‘2’ to ‘9’ .Press each key only once for one letter.
- (2) 4~7 candidate horizontal words display in English mode.
- (3) Navigate through the list of candidates shown on the screen with left right arrows
 .‘Down’ key or ‘0’ key to refresh lists of candidate
 .‘Up’ key or ‘CLR’ key to return to the previous list of candidates
- (4) If the words you wanted are displayed, select the candidates under cursor by pressing a ‘OK’ key.
- (5) To Enter punctuation or other characters, press the ‘1’key
- (6) To delete English 1 characters or space, press ‘CLR’ key.
 And to delete complete text, press and hold the ‘CLR’ key

For example, you can input 'tomorrow' with eZi text Editor

2. Using the Alphabet mode

(1) Press the key labeled with the required letter;

- .Once for the first letter
- .Twice for the second letter
- .And so on

(2) Select the other letters in the same way

[note] The cursor moves to the right when you press a different key. When entering the same letter twice or a different letter on the same key, just wait for a few seconds for the cursor to move right automatically, and then select the next letter.

- To enter some symbols such as commas, colons in the Alphabet mode, Press '1'key until you get the symbol you want to input
- To switch to Upper case or Lower case, Press '#' key and you will see the following current status displayed at the bottom bar;
 - .'ABC' : input an Upper-case letters
 - .'Abc' : The first letter is an Upper-case and then Low-case

.'abc' : input an Low-case letters

3.Using the Symbol mode

- (1) Press the 'Menu' key(Soft key(left))
- (2) Select '3.Symbol' menu and then display the various symbols
- (3) Use the navigation keys to scroll to the desired symbol and then press 'OK' key

※ Symbol Chart- General Mode(Contacts, schedule...and so on)

)	*	+	,	-	.	/	:
;	<	=	>	?	@	[\
]	^	_	`	{		}	~

4.Using the Number mode

Press the keys corresponding to the required digits

5.Using the Canned MSG mode

The Canned MSG enables you to easily enter some frequently used words or sentences.

- (1) Press the 'MENU' key
- (2) Select '5.Canned MSG'
- (3) Select the desired words or sentence on the list

[note] This pop-up menu is shown to you only when you edit the SMS messages.

Using the Menus

You can access most of your phone's features through a system of menus. And these functions are arranged in menus and sub-menus.

The menus and sub-menus can be accessed by scrolling with the navigation keys or by using the shortcuts.

Accessing Menu Functions by scrolling

- (1) In idle mode, press the Menu key(soft key(left)) to access menu mode.
- (2) Press the navigation key to scroll to reach the required main menu
- (3) Press the 'OK' key to select the desired menu.
 - To return to the previous menu level, press 'CLR' key
 - To exit the menu mode without changing the settings, press 'END' key

Using Shortcuts to access Menu Functions

The menu items(menu, sub-menus and options) are numbered and can be accessed quickly by using their number. Simply press the 'MENU' key and key in the required number.

[note]

- The numbers assigned to each menu option are indicated in the list on the next page. If user changes the menu order, they may not match the menu number on the phone.
- Some menu which their shortcut number are over 11 cannot be accessed by using shortcut numbers

Downloads

Detailed Methods of using and accessing 'Downloads' may vary according to your service provider.

WAP

Your phone comes equipped with a WAP (wireless Application Protocol) browser, making it possible for you to access the Wireless Web.

The WAP Browser allows you to ;

- access up-to-the-minute information via your phone
- view specially designed text versions of popular internet sites including Yahoo!

Accessing the WAP Browser

(1) In idle states, press the 'MENU' key

(2) Select 'WAP' menu or press the '2' key

Or

(1) In idle states, press the 'up(🔼)' in the navigation key.

Detailed Methods of using and accessing 'WAP' may vary according to your service provider.

My Foto

In this menu, you can use the MMS(Multimedia Message Service) message service very similar to Short Message Service(SMS)

Multimedia Message can contain images, graphics, voice and audio clips.

Using the MMS feature, your phone can receive multimedia and also send picture messages, which are short messages that contain images, such as your photos or graphics you downloaded from the internet.

This function is available only if it is supported by your service provider.

Compose

In this menu, you can create a new picture messages.

Detailed Methods of using and accessing 'MMS Message' may vary according to your service provider.

Notifications

This menu allows you to show the text notification with the sender's number when a new multimedia message comes in.

By selecting the 'Notifications' menu, you can shows brief information about the message, such as sender's number, the message size and the subject.

If you want to view the message, select the message and press the 'OK' key and then you can view it in 'Inbox' menu.

Inbox

In the menu, you can view the message selected in 'Notifications' menu.

Outbox

In this menu, you can view the list of the picture messages you sent

Draft

This menu allows you to view the list of the picture messages you saved to send later.

Template

In this menu, you can preset messages that you use most frequently.

Voice Mail

This menu provides you with a way of accessing your voice mailbox, if provided by your network.

By selecting this menu, you can connect to voice server and then check your voicemails.

Tones & Images

This Tones & Images menu contains several sub-menus.

Tones

In this menu, you can listen and select the one of the melodies you have downloaded from the server. And you can set the downloaded sounds as the current ring tone.

You can store up to 20 melodies

Images

In this menu, you can view the images downloaded from server and the pictures in photo album. You can set the downloaded images or the pictures in the photo album as the current background images.

The available Wallpaper are ;

- Standby
- Power On
- Power Off
- Incoming Call
- Outgoing Call
- Sending SMS
- Connect Internet

My SMS

The SMS(Short Message Service) is a network service.

When the message icon(✉) appears, it means that you have received new text messages. If the memory is full, an error messages is displayed and you cannot receive any new messages. Use the Delete option in each message box to delete obsolete messages.

Send Message

This Send Message menu enables you to input a new or saved message

1. New Message

- (1) Select 'New Message', if you want to create the new message.
- (2) Input the message contents. To change the input mode, press the 'menu' key(soft key(left))
- (3) To finish the message editing, press Right soft key
- (4) Select whether you want save the message in the Saved messages box
- (5) Edit the receiver's phone number. Receiver number can be inputted automatically by search menu, by name and by group
- (6) Select Message Priority type
- (7) If the sending is successful, you can save the message in the Outbox. If failed, you can save the message in the Draft

2. Saved Message

- (1) Select 'Saved Message', if you want to create the message from the saved messages box
- (2) Select the desired message in the list of saved messages.
- (3) Edit the receiver phone number. Receiver number can be inputted automatically by search menu, by name and by group
- (4) Select Message Priority type
- (5) If the sending is successful, you can save the message in the outbox. If failed, you can save the message in the Draft

Inbox

This messages box is used to store the messages that you have received

When you enter this inbox menu, the list of messages in the box displays with the sender's phone numbers or names, if available in your Phonebook.

- (1) Select the message from the list and press the 'OK' key to view and read. If there is no message, it will display an alert message
- (2) To scroll through the contents, press the 'up' or 'down' key in Navigation
- (3) To scroll to the previous or next messages, press the 'left' or 'right' key in Navigation keys
- (4) You can manage the message through the pop-up menu. Pop-up menu is displayed with the menu button (soft key(left))
 - .Delete : Allows you to delete the highlighted or selected message
 - .Delete All : Allows you to delete the all messages in inbox
 - .Reply : Allows you to reply to the sender by sending a text message.
 - .Transmit : Allows you to transmit the received message to other person. You can also edit messages, if required
 - .Save No.: Allows you to save the sender's information in the Contacts(see 'Contacts' menu)

Voice Msg

This menu provides you with a way of accessing your voice mailbox, if provided by your network.

- (1) Select the Voice Msg menu and press 'Ok' key
- (2) Display the sender number and received time of voice mail.
To listen to the message, press 'SEND' key.

Outbox

- (1) Select the 'Outbox' menu and press 'Ok' key.
- (2) Display the sending message list. If message is selected, the contents of the selected message is displayed
- (3) You can delete or forward the selected message with the pop-up menu.

Drafts

- (1) Select the 'Drafts' menu
- (2) Display message list. If message is selected, the contents of selected message is displayed
- (3) You can resend or delete the message through the pop-up menu

Delete

In this menu, you can delete the all of messages stored in inbox or Voice maill or Outbox.

- (1) Select the 'Delete'
- (2) Select the 'Yes' or 'No' when the message, 'Delete All?' is displayed

Settings

In this menu, you can set up the SMS environment.

1. Alert Type

- (1) Select the 'Alert Type'
- (2) Define the alert interval when message is received.

2. Alert Tone

- (1) Select the 'Alert Tone'
- (2) Define the alert sound which is ringing when the message is received

3. Show message

- (1) Select the 'Show message'
- (2) Define receiving message display type.
 - Title Only : Notify only the fact, message is received.
 - All contents : Display all contents of received message

4. Delivery ACK

In this menu, you can set the delivery acknowledgment

- (1) Select 'Delivery ACK'
- (2) Select 'Enable' if you want to receive the delivery acknowledgment when you send SMS to someone, or 'Disable'. If you don't want to.

5. Canned MSG

see 'Entering Text-using the Canned MSG'

Wap Alert

Detailed Methods of using and accessing 'WAP Alert' may vary according to your service provider

My Foto

see 'My Foto' menu,

Camera

By using the built-in camera module, you can take pictures of people or events while on the move. Additionally, you can send photos to other people in a picture message or as an e-mail attachment. The camera produces JPEG pictures.

- In idle states, select 'Menu'(soft key(left)) and then press '0' key, or
- In idle states, press the 'left' key on the navigation, or
- Press the 'Camera key' on the side of phone

Take Picture

This menu allows you to take a picture.

- (1) Accessing this menu turns on the camera. You can see the picture to be captured on the display
- (2) Adjust the picture by rotating the camera module. Use the 'left' and 'right' keys to adjust the brightness of the picture. Use the 'up' and 'down' keys to adjust the zoom of the picture.
The 'up' and 'down' keys on the left side of the phone allow you to flip the picture up and down.
- (3) Press the 'OK' key to take a picture.

※ In 'take a picture' states, press the 'menu' soft key(left) and then you can select the options as the follows;

1.Rotate	Allow you to flip the picture up and down
2.Image size	Allow you to select the image resolution <ul style="list-style-type: none">- VGA(640x480)- QVGA(320x240)- LARGE(128x144)- SMALL(128x96)
