Calibration Certificate Dosimetric E-field Probe

| Type: | IXP-050 |
|--|--|
| | |
| Manufacturer: | IndexSAR, UK |
| | |
| Serial Number: | 0177 |
| Place of Calibration: | IndexSAR, UK |
| | clares that the IXP-050 Probe named above has been the IEEE 1528 and CENELEC EN 50361 standards on the |
| Date of Initial Calibration: | 28 th March 2006 |
| | |
| The probe named above will | require a calibration check on the date shown below. |
| Next Calibration Date: | March 2007 |
| Next Calibration Date: The calibration was carried of document. Where applicable, the standa | March 2007 out using the methods described in the calibration ards used in the calibration process are traceable to the ratory. |
| Next Calibration Date: The calibration was carried of document. Where applicable, the standa | March 2007 out using the methods described in the calibration ards used in the calibration process are traceable to the |
| Next Calibration Date: The calibration was carried of document. Where applicable, the standa UK's National Physical Labo | March 2007 out using the methods described in the calibration ards used in the calibration process are traceable to the ratory. |
| Next Calibration Date: The calibration was carried odcument. | March 2007 out using the methods described in the calibration ards used in the calibration process are traceable to the ratory. |
| Next Calibration Date: The calibration was carried of document. Where applicable, the standa UK's National Physical Labo | March 2007 out using the methods described in the calibration ards used in the calibration process are traceable to the ratory. |

<u>Please keep this certificate with the calibration document.</u> When the probe is sent for a calibration check, please include the calibration document.
