#### Specific Absorption Rate (SAR) information:

This wireless phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA

(FCC) is  $1.6~\rm W/kg$  averaged over one gram of tissue. Device types: I70 (FCC ID: SG720151015I70) has also been tested against this

SAR limit. The highest SAR value reported under this standard during product certification for use close to head is 0.528W/kg and body-worn is 0.485W/kg. This device was tested for typical body operations at 1.0cm from the body. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body Operation
This device was tested for typical body support operations. To comply with RF exposure requirements, a minimum separation distance of 1.0 cm must be maintained between the user's body and the device, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
