Subject : Class II Permissive Change  
Company : Yokogawa Electric Corporation  
Product : VN210  
FCC ID : SGJ-WFC001

This is to request a Class II Permissive Change Application for FCC ID: SGJ-WFC001 originally granted on June 25, 2010.

We, Yokogawa Electric Corporation would like to add two additional antennas which have higher antenna gain than original.

Except additional antennas, there are no differences for the device, therefore no modification was made in radio/electrical characteristics and the product still complies with FCC Part 15 Subpart C of FCC rules and the FCC radio frequency (RF) Exposure rules.

Since adding two antennas, the spurious emission test was performed for VN210. The overall data met the standard.

Sincerely,

須田 弘文

Hirofumi Suda

Yokogawa Electric Corporation
