You can also adjust the speed of tracking, double-click and scrolling

After setting the functions please click "Apply", if you need default functions just click "Restore Defaults"

## ➤ **Building Up the Connection Between Mouse and Receiver**

If your mouse cannot work normally, you can try to build up the connection again between mouse and receiver, as following steps:

1. Take out the Nano receiver from computer and insert again, it will detect automatically for about 15 seconds.
2. Keep the mouse in ON mode and with battery in correct direction.
3. Keep the effective distance within 10 CM between the mouse and receiver.
4. Press the middle button (scroll wheel) and right button at the same time for about 1~3 seconds, then release it. The connection is being built for about 10 seconds.
5. If cannot build up the connection in 10 seconds, please repeat the above steps.

## ➤ **Debugging Tips**

- Check the receiver if is connected to the USB port.
- Check the ON/OFF button if in ON mode.
- Check the effective distance between mouse the receiver and shorten it.
- Rebuild up the connection between the mouse and receiver.

## ► Declaration of conformity

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
