WIRELESS KEYBOARD

TO CREATE VALUE FOR CUSTOMERS

TO CREATE VALUE FOR CUSTOMERS

Thanks for choosing 2.4G wireless keyboard, please read the manual before using.

## Contents:

2.4G ultra-slim keyboard

Receiver

2\*AAA batteries

Manual

1

## Specification:

### Keyboard

2.4 G wireless, effective distance 10M  
10 sets multi-media keycaps, comfortable  
Power saving, extended battery lifetime  
Low battery indicator

### Receiver

Mini design with fashion

### Instruction of the battery

It takes 2\*AAA batteries for the wireless keyboard  
Please take out the batteries if you do not use the wireless products for long time, and keep them in a cool and dry place  
Please do not use the battery if leaking, discoloration, distortion or other abnormality happens.

2

## Battery installation to the keyboard

1. Press the button on the keyboard, the battery buckle will eject out

2. Put into 2\* AAA (7#) batteries in correct direction

3. Cover the buckle

A lower battery indicator is adopted in the keyboard. It will flash when the batteries are running out. At this time please change the batteries, you are recommended to use the battery with the same type, new battery and old battery cannot be mixed to use.

## Connection of the receiver

Connecting the receiver to the PC by the USB port  
Building up connection between the keyboard and receiver  
Please build up the connection under the conditions as follow:  
If there is radio disturbance from other wireless keyboard or mouse  
Somebody try to build up the connection, but failed

3

4

## Building up connection between the keyboard and receiver

Pull out the receiver from the USB port at first, and press the CONNECT button at the bottom of the keyboard, the indicator on the keyboard will flash at this time. Connect the receiver to the USB port within 15 seconds, when the USB receiver is detected, the indicator will turn off, and can be used. If not, please try again.

5

## Working Environment

The receiver should be far away from the Monitor, outside disc driver or other electronic products, in order to prevent the radio disturbance produced by other electronic products the suggested distance is above 20 centimeters

The radio signal can penetrate lignin, glass and so on the non-metallic objects, achieves 360 degree free transmit, but it can not penetrate the metal materials, so please do not put the mouse and the receiver onto the metallic tabletop, suggested distance is above 20 centimeters; Please be sure there is no big size metal between the mouse and receiver, otherwise the connection will be affected.

Optical mouse is suitable for operating media wooden, paper or cloth, but not for the ratent, such as glass and smooth rubber. A mouse pad is needed in such environment.

The standardized receiving distance we offered is under certain radio disturbance environment, the normal environment are better, the actual receiving distance is higher than standardized, but if mix-machine, motor, electric drill and other strong electronic equipments operating nearby, which may lead to slowly receiving or other abnormality.

## FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

7

This device must not be co-located or operating in conjunction with any other antenna or transmitter. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

## Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.

8

## Trouble Shooting

- Check the receiver again, be sure it is connected to the USB port.
- Check the battery direction should be correct.
- Check the battery if have enough power.  
If not, then need change to use another 2\*AAA batteries
- Reduce the distance of the receiver and the keyboard”
