

Federal Communications Commission,
Authorization & Evaluation Division,
7435 Oakland Mills Road,
Columbia, MD 21046

Gentlemen,

OQO was recently granted certification of its product "Model 02", with FCC ID SHD-A8YWFS.

OQO is now requesting a Class II Permissive Change to allow concurrent operation of the product's WLAN (802.11 a/b/g) transmitter with its WWAN transmitter (Novatel's E725 mini-PCI-express module, with its own grant PKRNVWE725). No hardware changes are required to allow concurrent transmission. Concurrent transmission is achieved by software changes only, and these changes cannot be made by the end user.

Thank you for your consideration of our Class II Permissive Change application.

Sincerely,

A handwritten signature in black ink, appearing to read "Hans Hartmann".

Hans Hartmann
Vice President of Engineering
OQO, Inc.
