

Federal Communications Commission,
Authorization & Evaluation Division,
7435 Oakland Mills Road,
Columbia, MD 21046

Gentlemen,

OQO was recently granted certification of its product "Model 02", with FCC ID SHD-A8YWFS.

OQO is now requesting a Class II Permissive Change to allow operation of the product's WLAN (802.11 a/b/g) transmitter in the frequency band 5.470 – 5.725 GHz (i.e., the 5 GHz "mid" band). No hardware changes are required to allow transmission in this "mid" band. Transmission in this "mid" band is achieved by firmware changes only, and these changes cannot be made by the end user.

Thank you for your consideration of our Class II Permissive Change application.

Sincerely,

A handwritten signature in black ink that reads "Bob Groppo".

Bob Groppo
Vice President of Engineering
OQO, Inc.
