

CA330 Wireless Camera

Nov, 29th, 2007

Architecture

CA330 Wireless camera includes high quality video and audio components. When combined with a RDI **Wireless Video Monitor/Receiver**, you have an ideal combination for watching the baby, monitoring the porch, pets, yard or the pool. It is also suite to many small business applications.

CA330 wireless camera hardware architecture is show in Block diagram

- 1> The camera is base on a single-chip COMS camera sensor (OV7910) provide a high quality video, built-in an audio microphone, auto turn on/off IR LED for night vision and audio alert when audio volume over preset level.
- 2> The 900MHz TX module is assigned to transmit the video and audio signal.
- 3> MCU (Micro control unit) scans the switch to select the RF module channel and audio detected control.
- 4> Energy is supplied by 9V camera adapter.
- 5> 15mm wire antenna is fixed on the PCB permanently.
