

USER MANUAL

Dual Mode (Wi-Fi + PWiFi) Baby Monitor
Model No. : WM544514H

WARNING

STRANGULATION HAZARD - Keep cord out of child's reach. NEVER place camera or cords within 3 feet of crib or playpen. Never use extension cords with AC Adapters. Only use the AC Adapters provided.

- Some adult assembly or installation required.
- This product contains small parts that may cause choking. Keep small parts away from children.
- This product is NOT intended to replace proper supervision of children. You MUST check your child's activity regularly, as this product will not alert parents to silent activities of a child.
- Before using this product, read and follow all instructions contained in this booklet, and read and follow all instructions and warnings on the product.
- NEVER use the transmitter or monitor near water, including near a bathtub, sink, laundry tub, wet basement, etc.
- This product is intended for indoor use only.
- This product is not intended for use as a medical monitor and its use should not replace adult supervision.
- The transmitter detects normal sound levels within a range of 2 to 3 meters (6 to 10 feet) from a child. If the child moves outside of this range, it may not be able to detect sounds from him or her.
- It is essential that you check the operating range and condition of the transmitter monitor on initial installation and on a regular basis after that.
- Check reception regularly. Test monitor before use and after changing camera location.
- Do not take apart the product by yourself.
- To prevent overheating, keep the product and AC power adapters away from any direct sunlight and heat sources such as radiators, heat registers, cooking devices (e.g., stoves and ovens) and other appliances that produce heat (e.g., amplifiers, televisions and stereos).
- Ensure that the product is well ventilated during use. Avoid contact with pillows and furniture that may block ventilation.
- Use only the AC adapters provided with the product, as other adapters may damage the product. Plug the adapters only into standard household current (100~240 volts AC). Place the AC adapters avoiding pinch points otherwise you can damage the adapters.
- When an AC adapter is plugged into a power source, DO NOT touch the exposed end of the AC adapter's cord.
- Do not use extension cords with the AC power adapters to avoid entanglement.
- Images and sounds are transmitted by the product over public airwaves and transmissions may be picked up by other units. (Although the transmission distance is 100m or longer, it may vary depending on whether there are obstacles between the camera and the monitor.)
- Caution if you use the system to watch a young child, do not place the camera where the child can reach.
- When using the system with only battery power and the charge is low, then the picture and or sound may be affected. If this occurs then please connect the AC power adapter.

The transmission range of the wireless signal may weaken if heavy obstructions such as a concrete, brick, or metal walls are between the camera and monitor, or if there are several Wi-Fi routers and devices in your environment.

To avoid interference with RF signal, keep your cell phone at least 3ft away from the Camera and

Monitor.

CAUTION

Risk of explosion if battery is replaced by an incorrect type.
Dispose of used batteries according to the instructions.

Features:

- 2.4 GHz PWiFi + WiFi dual mode technology
- System expandable up to 2 cameras, single or split display
- Multiple (6) languages selection
- Camera with night vision and sound trigger
- Lullaby and temperature display
- 2-way audio, monitor or smart phone can talk back to camera
- 5" capacitive touchscreen monitor
- Remote pan & tilt, digital zoom
- Free iOS & Android APP.

What's Included

Product Overview

Wireless Camera

1. Pair Button: a. Establishes a new connection between the camera and monitor during the pairing process, b. Push and hold to reset camera when adding camera to App
2. IR Sensor & LEDs: Infrared LEDs provide viewing in NO/LOW Light conditions.
3. Image sensor/Lens
4. Microphone: Detects & transmits the sounds from camera to monitor.
5. Temperature Sensor: The measured ambient temperature is displayed on the monitor.
6. Speaker: Enables the ability to talk from monitor/phone to camera and play lullabies.
7. 1/4" nut for goose neck bracket
8. Antenna: Sends & receives signals to or from the monitor.
9. DC 5V Power Input: Input for the power adapter, 5V 1A, type C connector
10. Wall Mounting Screw Holes

Wireless Monitor

1. Antenna: Sends & receives signals to or from the Camera.
2. Sound Bar: Indicates the level of sound detected by the Camera.
3. DC 5V Power Input: Input for the Power Adapter 5V 1A. (type C connector)
4. Screen: 5" capacitive touchscreen panel.
5. Microphone: Detects & transmits the sound from monitor to camera.
6. Power On/Off button:
 - a. Press and hold to switch the monitor on/off.
 - b. Short press will change monitor to power save mode (Audio always on)
 - c. In power save mode, when VOX on, higher sound will activate the monitor.
7. Kick Stand: Enables the table stand for the monitor.
8. Battery: Rechargeable lithium polymer battery for portable use.

Getting Started

Live View:

In camera list,

Touch the icon , you can get multi camera view in one page.

Touch each camera in the list, you can get single camera view.

In single camera view

 Touch this icon, you can activate audio or turn off audio.

 Touch this icon to get full screen live view in portrait

 Touch this icon, you can change the live view resolution between HD and SD

 26.0°C: Camera room temperature.

 Touch this icon will show control icons or hide control icons.

 Touch this icon to get full screen live view in landscape

 Touch this icon to get a snapshot for the live view, store in your

cell phone, you can go to the icon  to view the snapshot.

 Touch this icon to talk to camera from your cell phone, you can go to top-right corner  \basic settings\talk mode to select one way or two-way (full duplex) talk.

 Touch this icon to record current live view into your cell phone, you can go to the icon  to view the recording.

 Touch this icon to see the snapshot you took from live view, you can share the selected snapshots via skype, wechat or other social media, or send through e-mail.

 Touch this icon to change App theme color, Light Mode or Dark Mode.

 Touch this icon to select night vision mode: Auto, (always) Off or (always) On, red color means night vision is on.

 Touch this icon to change device (camera) volume.

 Touch this icon to activate or deactivate sound detection (VOX), , red means sound detection is activated. You can go to top-right corner  (settings)\Sound Detection to set the sound detection sensitivity.

Touch this icon to turn on/off room temperature alert and high temp. limit and low temp. limit, see right side

set alert

Touch this icon to turn on/off night light or set schedule for night light on and off.

Touch this icon to turn on/off lullaby or change different lullaby.

Specification

| Kit | |
|------------------------------|--|
| Operating Frequency Range | 2400MHz-2483.5MHz |
| TX Power | 15+/-1dBm (Wi-Fi) |
| RX Sensitivity | -89dBm (Wi-Fi) |
| Type of Spread Spectrum Used | ?Wi-Fi |
| Type of Modulation Used | GFSK, 802.11b/g |
| Data Rate | WiFi (802.11b/g) |
| Communication Range | WiFi (camera to router): 120m line of sight The transmission range of the wireless signal may weaken according to your environment. |

| Camera | |
|-----------------------------|------------------------------|
| Image sensor type | 1/4" Color CMOS Image sensor |
| Effective Pixel | 1920 (H) x 1080 (V) |
| Power requirement | 5V DC 1A |
| Image Resolution | 1920*1080 |
| Lens | 3.0mm F2.0 |
| Viewing Angle (Diagonal) | 83° (H), 43°(V), 93° (FOV) |
| IR LED / Night Vision Range | 5m 940nm |
| Operation temperature | -10~40°C |

| Monitor |
|---------|
|---------|

| | |
|-----------------------|---------------------------|
| LCD Panel size | 5" capacitive touch panel |
| LCD Resolution | 720p RGB |
| Operating Temperature | 14°F~104°F (-10~40°C) |
| Operating Humidity | 0% ~ 85% |
| Power requirement | 5V DC 1A |

Note:

This item is in compliance with FCC test standard: Part 15C 15.247.

FCC Warning

15.19 Labeling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Radiation Exposure Statement:

- 1.This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
- 2.This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
