## What's in the box?

WL100 Camera **Power adaptor** **Mounting Hardware** **User manual**

Camera Overview

Antenna

MIC

Image Sensor

LED x 6

Working indicator

IR LED
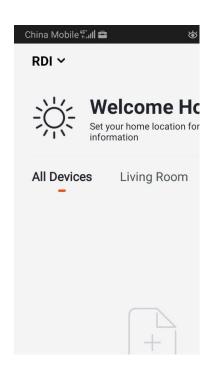

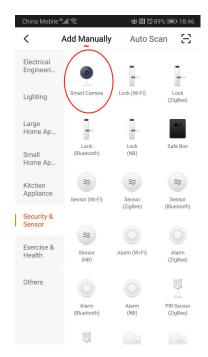

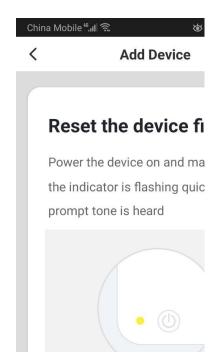

PIR Sensor

Speaker

Reset key

Getting Started

1. Go to App store or Google Play Store to download and install **TuyaSmart** on your smart phone, and register your account per instruction step by step from App.

2. Install and set up the camera

    a. Go to your phone WiFi Settings, and connect your phone to the router which you want to register WL100 to via 2.4G, do not connect the router through 5G

    b. Open TuyaSmart, touch "Add Device" at the bottom, select "Security & Sensor" from the left category, and then select "Smart Camera"

Power on your WL100 camera, there will be an audible alert (a short music) and then the indication LED (working indicator) will be fast flash and with "du-du" sound about every 17 seconds, (if the camera LED is not in fast flash and no "du-du", pls reset the camera by pushing and hold the reset key at the rear of the camera for 5 second).

Go to the next step, input your home router WiFi password, create a QR code, let camera scan the QR code, once you hear an audible sound（du---）, means the camera scan QR code successfully, after a while APP shows connect successfully and the camera indication LED will change to solid green, means camera connected to router successfully.
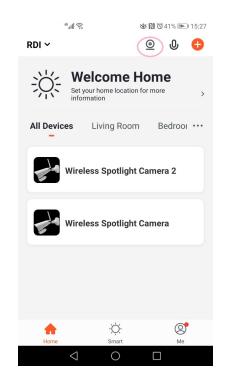

NOW YOU CAN USE YOUR SMART PHONE TO CONNET TO YOUR CAMERA, WATCH LIVE VIEW, PLAYBACK, TWO WAY TALK ETC. FREELY

Live View:

In camera list,

Touch the icon ⊙, you can get multi camera view in one page.

Touch each camera in the list, you can get single camera view.

In single camera view

🔇 --Touch this icon, you can activate audio or turn off audio.

HD Touch this icon, you can change the live view resolution between HD and SD

⤢ Touch this icon to get full screen live view..

📷 Touch this icon to get a snapshot for the live view, store in your cell phone.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled enviroment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
