Re: FCC ID: SJS-400099WH

To Whom It May Concern:

The following application is submitted on behalf of our client, MARS Company, for evaluation of their model 400099WH for certification under FCC Part 15.247.

The MARS 400099WH radio was designed as a stand-alone radio transceiver to read water encoders and transmit this reading to client receivers. The MARS 400099WH operates in the 900MHz ISM Band as a frequency hopping spread spectrum device. The application of the MARS 400099WH is to be connected to a water meter encoder outside of a pit configuration.

This certification filing covers the Frequency Hopping Spread Spectrum mode of operation only. All other modes of operation declared in the Theory of Operations accompanying this certification filing are disabled in the software of the device.

The 400099WH was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
