September 8, 2008

To whom it may concern:

The enclosed documents constitute a formal submittal and application for Equipment Authorization for a wireless LAN device pursuant to the following rules:

Subpart C of Part 15 of FCC Rules (CFR 47)
Subpart E of Part 15 of FCC Rules (CFR 47)

For certification against FCC rules the device is considered to be a composite device subject to certification under DTS and NII product codes. It is initially being requested for certification in the 5150 – 5250 MHz NII band and 2400 – 2483.5 MHz, 5725 – 5850 MHz DTS bands. A C2PC will be filed at a later date to add the 5250 – 5350 MHz and 5470 – 5725 MHz bands as a master device directly with the FCC on completion of this application.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

Please note that this application is similar to those previously filed for the Xirrus models XN8 and XN16 (FCC IDs SK6XN8 and SK6XN16).

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

A handwritten signature in black ink that reads "Mark Briggs".

Mark Briggs
Principal Engineer
