Xirrus Models: XN16, XN12, XN8

Gentlemen:

Details of proposed changes to the models XN8, XN12 and XN16  
(FCC IDs SK6XN8, SK6XN12 and SK6XN16)

The only change being proposed to all three devices in the series (XN8, XN12 and XN16) is the ability to operate in the 5250-5350MHz and 5470-5725 MHz bands as a FS master device. The current certification covers only the 5150-5250MHz UNII band of operation.

The proposed change will be achieved through a firmware change and there are no modifications made to the hardware.

Sincerely

A handwritten signature in blue ink, appearing to read "Patrick Parker". The signature is stylized and fluid.
