FOR WIRELESS LAN
IEEE 802.11n
IEEE 802.11g
IEEE 802.11b

SEE MANUAL BEFORE USE
The device is not to be used in the following areas:
1. Areas where the use of radio frequency equipment is prohibited.
2. Areas where the use of radio frequency equipment is restricted.
3. Areas where the use of radio frequency equipment is allowed only under certain conditions.
4. Areas where the use of radio frequency equipment is allowed only for specific purposes.
5. Areas where the use of radio frequency equipment is allowed only for specific frequencies.
6. Areas where the use of radio frequency equipment is allowed only for specific power levels.
7. Areas where the use of radio frequency equipment is allowed only for specific modulation schemes.
8. Areas where the use of radio frequency equipment is allowed only for specific protocols.
9. Areas where the use of radio frequency equipment is allowed only for specific applications.
10. Areas where the use of radio frequency equipment is allowed only for specific services.
11. Areas where the use of radio frequency equipment is allowed only for specific users.
12. Areas where the use of radio frequency equipment is allowed only for specific purposes.
13. Areas where the use of radio frequency equipment is allowed only for specific frequencies.
14. Areas where the use of radio frequency equipment is allowed only for specific power levels.
15. Areas where the use of radio frequency equipment is allowed only for specific modulation schemes.
16. Areas where the use of radio frequency equipment is allowed only for specific protocols.
17. Areas where the use of radio frequency equipment is allowed only for specific applications.
18. Areas where the use of radio frequency equipment is allowed only for specific services.
19. Areas where the use of radio frequency equipment is allowed only for specific users.
20. Areas where the use of radio frequency equipment is allowed only for specific purposes.
