To whom it may concern:

The enclosed documents constitute a formal submittal and application for Equipment Authorization for an 802.11abgn Access Point Array pursuant to the following rules:

Subpart C of Part 15 of FCC Rules (CFR 47)
RSS-Gen Issue 2, June 2007, "General Requirements and Information for the Certification of Radiocommunication Equipment"
RSS-210, Issue 7, June 2007, "Low-power Licence-exempt Radiocommunication Devices (All Frequency Bands): Category I Equipment"

For FCC certification the device is considered a composite device as it falls under both DTS (15.247 2.4GHz and 5GHz bands) and UNII (5150-5250 MHz) categories. For Canadian certification we are requesting a single product certification against RSS 210. Please note that we are excluding operation in the 5250 – 5350 MHz and 5470 – 5725 MHz from the scope of certification at this time. Xirrus intend to add these bands through a C2PC with the FCC and through a re-assessment for Industry Canada.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Mark Briggs
Staff Engineer
