Re: FCC ID: SK9AMI-3, IC: 864G-AMI3

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model C2SOD for a class II permissive change under FCC Part 15.247 as well as IC Radio Standards Specifications RSS-210.

The modifications made from the original certified device include the replacement of the current 900 MHz transceiver chip with a transceiver chip that is a footprint compatible component with performance improvements and improved reliability due to internal construction of the part.

The device was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,
