FCC ID: SK9C3A-1H
IC: 864G-C3A1H

Dear Sir:

The following application is submitted on behalf of our client, Itron Electricity Metering Inc., for evaluation of their model C3A1H for a Class II Permissive change in accordance with Part 2 of the FCC rules and RSP-100 for Industry Canada. This Class II Permissive Change is to address a change in the RF ASIC chip. The new chip is pin for pin compatible from the previous version. The new chip has the same basic function as the old chip, from an external perspective, and no change in radio parameters has occurred.

Included in this application are schematics and a parts list which can be used to identify the new RF ASIC. A test report will accompany the application and will include all characteristics required for a new certification filing, although some characteristics may not have degraded from the original application.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kirby Munroe', with a long horizontal flourish extending to the right.

Kirby Munroe
Director, Wireless Certifications
