Re: FCC ID: SK9CRUG1

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model C2SOR for certification under FCC Part 15.247 and 15.249.

The C2SOR contains (3) transceivers which include (1) frequency hopping 900 MHz LAN radio and (2) 2.4 GHz Zigbee radios each of which was evaluated separately to the corresponding rules. Both the 900 MHz LAN and a high power 2.4GHz Zigbee radio were evaluated to Part 15.247 with a second lower power 2.4GHz Zigbee radio evaluated to Part 15.249.

The C2SOR also contains two pre-approved cellular modems, FCC ID: N7NMC8790 and FCC ID:N7N0MC5725. The C2SOR has one of the two modems installed, but not both. All radios in the device can transmit simultaneously therefore the C2SOR was evaluated for radiated inter-modulation products and found in compliance.

Sincerely,
