Re: FCC ID: SK9ITR900-1

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model ITR900 for a class II permissive change under FCC Part 15.247.

The difference between the previous certified IRT900 device is a new data rate (153.6 kbps). No modifications to the RF section, as previously reported, have been made with only minor software differences from the previously certified device. Therefore no updated internal or external photographs have been supplied.

All characteristics likely affected by the increased data rate were evaluated and included in this application.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive style with a large, stylized 'R'.
