Attention: Application Examiner

RE: Request for confidentiality per FCC Rule Sections 0.457 and 0.459
Applicant: **Itron Electricity Metering Inc.**
FCC ID: SK9ITR900-1
Description: 900MHz FHSS radio module

To whom it may concern,

The referenced module will be installed in products that will be co-located with other module antennas. A class 2 permissive change has been submitted for the co-location condition, and the final product user manual will contain the RF exposure information for the installer.

The manual for the final product will be submitted as an exhibit to support the class 2 permissive change. Tropos requests that this manual be kept confidential indefinitely, with the following justification:

1. The final product itself is not subject to certification and therefore will not have any other product information available on the FCC EAB website.
2. The manual is used as a service manual only by qualified installers and technicians.
3. The referenced product is sold only to power utilities and is not available on the general market. The product will be located on utility property, either on power poles or inside the building. It will not be available for public inspection.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS
EMC Consultant/Agent for Itron Electricity Metering Inc.
