Re: FCC ID: SK9M2LG1

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model M2 Gateway for certification under FCC Part 15.247.

The M2 Gateway is a stand-alone module designed to be integrated into specific host devices. The M2 Gateway is a composite device which contains (2) transceivers. These include (1) frequency hopping 900 MHz LAN radio and (1) 2.4 GHz Zigbee radio each of which was evaluated separately to the corresponding rules and found to be in compliance. The M2 Gateway was evaluated in host devices representative of the final installation.

Both radios can transmit simultaneously therefore the device was also evaluated for radiated inter-modulation products and found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive style with a large initial 'R'.
