Declaration Letter

We, HID Global Corporation, the owner / manufacturer of the product listed below, hereby declares that the duty cycle of the BLE transmit function is limited to a maximum of 2.08%. The BLE radio firmware limits the periodic frequency of transmissions to a maximum of once every 20 ms, and the operational firmware limits the maximum data payload to 37 bytes which results in a transmit burst duration of 416 μ s. In any 100 ms period, the transmit function is no greater than 2080 μ s (2.080 ms).

Product: BLE Long Range Beacon
Model Name: BEEKS LR
Model no: BEEKSLR001
