## 1. Safety Instructions

- Read the safety instructions before installation.
- Make sure you understand the safety instructions before installation.

Electrical installations in hazardous areas possess features specially designed to render them suitable for operations in such atmospheres. It is essential for reasons of safety in those areas that, throughout the life of such installations, the integrity of those special features is preserved; they therefore require initial inspection and either a) regular periodic inspections thereafter, or b) continuous supervision by skilled personnel in accordance with this standard and, when necessary, maintenance.

### Training

The inspection and maintenance of installations shall be carried out only by experienced personnel, whose training has included instruction on the various types of protection and installation practices, the relevant rules and regulations and on the general principles of area classification. Appropriate continuing education or training shall be undertaken by personnel on a regular basis.

Skilled personnel must be provided with sufficient training to enable familiarity with the installation which they attend. This training shall include any plant, apparatus, operational or environmental conditions which relate to their understanding of the needs of the explosion protection of apparatus. Where any alterations or changes to the process or installation are affected this information shall be provided to the skilled personnel in a manner which supports their function as part of the continuous supervision process.

### Inspection

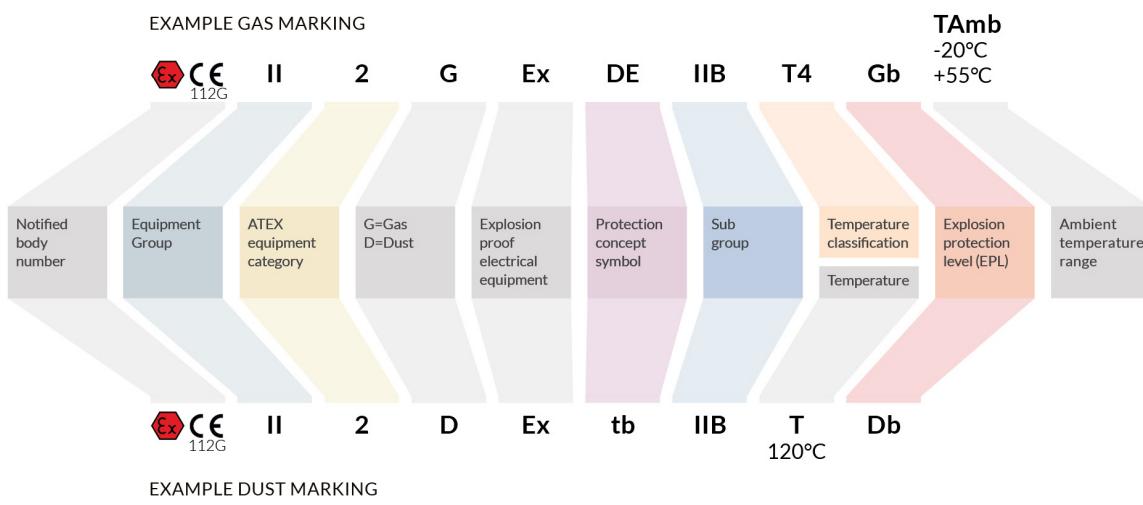

Before the apparatus is brought into service, it shall be given an initial inspection. To ensure that the installations are maintained in a satisfactory condition for continued use within a hazardous area, either a) regular periodic inspections, or b) continuous supervision by skilled personnel, and, where necessary, maintenance shall be carried out. If the apparatus is dismantled during an inspection, precautions shall be taken during reassembly to ensure that the integrity of the type of protection is not impaired.

Typical inspection schedule:

- Apparatus is appropriate to area classification as defined by the label
  - Apparatus temperature class is correct
  - Apparatus category and gas/dust class is correct
- IP grade of apparatus is appropriate to conductivity of dust
- Apparatus circuit identification is available
- Enclosure, glasses and glass to metal sealing gaskets and/or compounds are satisfactory
- There are no visible unauthorized modifications
- Bolts, cable entry devices and blanking elements are of the correct type and are complete and tight
- Apparatus is adequately protected against corrosion, weather, vibration and other adverse conditions
- No undue accumulation of dust and dirt
- Apparatus installed is that specified in the documentation

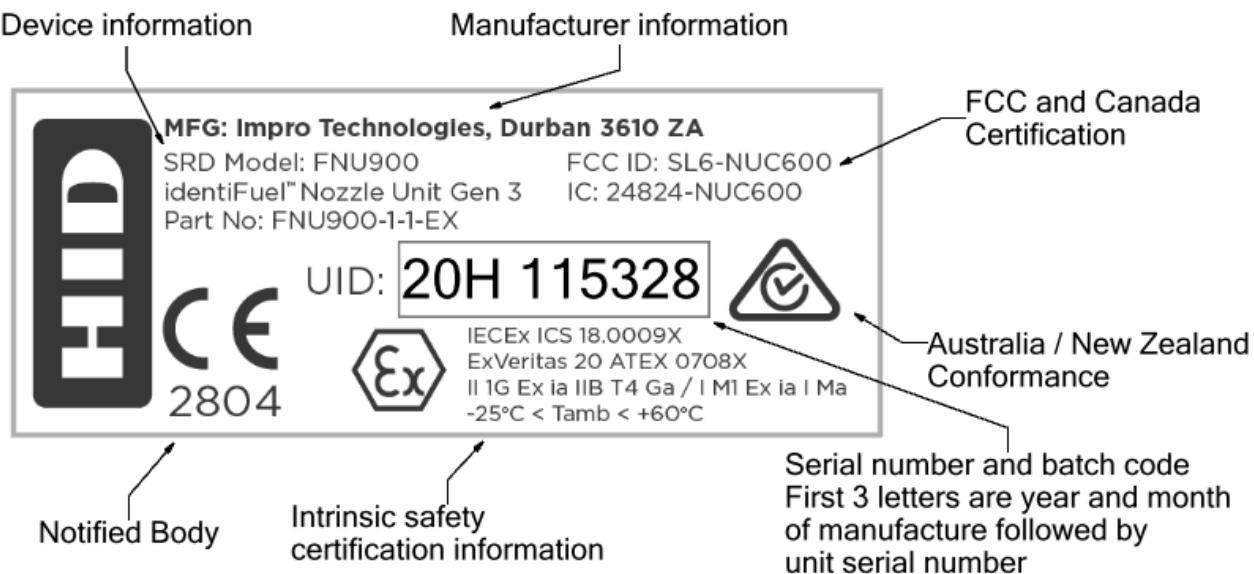

## Label

The label for the apparatus can be found on the underside of the device and contains all applicable information regarding the safety certifications of the device as outlined below:

## Label Information

The FNU900 nozzle unit has the following label affixed to the unit with the following information available.

## Maintenance

The general condition of all apparatus shall be noted, and appropriate remedial measures shall be taken where necessary. Care shall be taken, however, to maintain the integrity of the type of protection provided for the apparatus; this may require consultation with the manufacturer. Replacement parts shall be in accordance with the manufacturer's safety documentation. Alterations to apparatus shall not be carried out without appropriate authorization where they adversely affect the safety of the apparatus as stated in the safety documentation.

## Environmental conditions

Electrical apparatus in a hazardous area can be adversely affected by the environmental conditions in which it is used. Some of the key elements to consider are corrosion, ambient temperature, ultraviolet radiation, ingress of water, accumulation of dust or sand, mechanical effects and chemical attack.

## Installation

Maintenance work may be carried out on energized apparatus subject to the conditions detailed below.

- Disconnection of, and removal or replacement of, items of electrical apparatus and cabling.
- Adjustment of any controls necessary for the calibration of the electrical apparatus or system.
- Removal and replacement of any plug-in components or assemblies.
- Use of any test instruments specified in the relevant documentation. Where test instruments are not specified in the relevant documentation, only those instruments which do not affect the intrinsic safety of the circuit under test may be used.
- Any other maintenance activity specifically permitted by the relevant documentation.

The person carrying out any of the functions described above shall ensure that the intrinsically safe system or self-contained intrinsically safe apparatus meets the requirements of the relevant documentation after completion of any of those functions.

## Operation

The operator will ensure that:

- The unit is maintained and operated, in accordance with the manufacturer's instructions and in such a way as to minimize the risks of an explosion.
- The vehicles ignition is switched off during the insertion and operation of the unit.
- There are no risks in the explosive zone that could be a potential risk for explosion.

## 2. identiFUEL™ Nozzle Unit

### Universal Low Frequency RFID Readers & Transmitter to Fit on Fueling Nozzles

- *Reads vehicle tag and identifies vehicle to the Fuel Management System*
- *Automatic activation and standby mode via Tilt Switch*
- *Supports a range of standard filling nozzles*

The HID Global identiFUEL™ Fueling Nozzle Unit is a universal, intrinsically safe RFID reader, used for Fueling Management Systems (FMS). The Fueling Nozzle Unit can fit onto a wide variety of standard fuel filling nozzles. The unit turns a filling nozzle into an RFID reader that is automatically activated when the nozzle is moved. The Fueling Nozzle Unit works in combination with identiFUEL Vehicle Tags and Wireless Controllers as an RFID front-end for Fuel Management Systems.

As soon as the Fueling Nozzle Unit detects a corresponding vehicle tag, the tag's unique ID and required fuel information is sent via an encrypted channel to the corresponding identiFUEL™ Wireless Controller. The controller communicates to the FMS software, which decides if and how much fuel to dispense. Once the nozzle is removed from the vehicle, and the vehicle tag can no longer be read, the Fueling Nozzle Unit notifies the FMS to stop the fuel dispersion.

The identiFUEL™ Fueling Nozzle Unit includes a dual-color LED that indicates whether the unit is operational, and a tag was successfully read. The rugged housing makes the Fueling Nozzle Unit resistant to typical fueling environments and rainwater.

### Key Technology Highlights

- Lighter smaller compact universal design
- Simple installation on various existing nozzles
- Fully encapsulated rugged & antistatic design
- ATEX / IECEx compliant
- Multi-year battery life
- Over the air firmware upgradeability
- Completely wireless operation
- RFID auto-tune to compensate for environmental variance (amount of metal)
- Heartbeat packet (to check in with system when not in use for long periods of time)
- Anti-tamper feature (attempt to remove unit is reported to system)
- Real time battery voltage reading
- Drop and impact detection
- Pitch and roll angular limitation for control of valid reading (configurable option)

## How does it work?

- 1) The nozzle unit fitted to the filling nozzle reads the 125 kHz passive RFID vehicle tag when the nozzle is inserted into the fuel filler pipe, unit remains asleep until moved at which point it searches for a tag.
- 2) The nozzle unit then sends the tag info along with unit info every 2.2 seconds (ID, status, etc.) over a 433.92 MHz encrypted proprietary RF data link to the Wireless Controller.
- 3) If the frontend validation passes, the Wireless Controller sends authorization information and a "Nozzle In" condition, to the Fuel Management System (FMS) which is then responsible for checking whether the vehicle is valid or not according to predefined business rules. It then interacts with the dispensing systems to allow fueling to start.
- 4) If the nozzle is removed, the unit will not be able to read the vehicle tag anymore and send the appropriate information to the Wireless Controller.
- 5) The Wireless Controller interprets this as a "Nozzle Out" condition and sends a message to the FMS. The FMS will then be able to stop fuel dispersion, complete the fueling process and record a completed transaction.

### 3. Specifications

<b>Electronic</b>	
<b>Base Model Number</b>	FNU900
<b>Transmitter Frequency to Wireless Controller</b>	433.92 MHz
<b>RFID Reader (scanner) to Operating Freq. range to Vehicle</b>	121-129kHz
<b>Max. Distance to Wireless Controller</b>	328 ft. (100 m)
<b>Data Format</b>	EM4582/HitagS - Bi-Phase/Manchester (modulation)
<b>Modulation</b>	OOK
<b>Data rate</b>	16.7 kbps
<b>Duty Cycle</b>	50%
<b>Mode of operation</b>	Simplex
<b>Max RF output power</b>	10 dBm
<b>Power Supply</b>	2 x 2.5 Ah Lithium Thionyl Chloride Batteries
<b>Power Supply Lifetime</b>	~3 years battery life @ 200 minutes per day operation *
<b>Mounting Method</b>	Screws (4 Screws)
<b>Fits nozzle types</b>	Elaflex, SL1 (ER 242.1T), Elaflex, SL1 (ER 242.1) Elaflex, SL1 (ER 242.2) Elaflex, SL2 (Vapour Recovery) Elaflex, SL2 (ER042.1) Elaflex, ZVA Adblue HV Elaflex, ZVA Adblue LV OPW, OPW11 OPW, OPW7H OPW, Avance Gas + Vapour Recovery OPW, Avance, Diesel OPW, 12VW Husky, 1A Husky, VIII
<b>Housing Material</b>	Glass filled Nylon (PA6)
<b>Colour</b>	Black
<b>Water</b>	IP66
<b>Withstands Exposure to</b>	Fuel B, mineral oil, petroleum, salt mist, vegetable oil
<b>Environmental Test Conditions</b>	68° F (20° C), 100 h
<b>Humidity</b>	0 to 95% relative humidity at +104° F (+40° C) non-condensing
<b>Drop Test</b>	1 m (3.28 ft) drop (in packaging)
<b>Storage</b>	-40° to +176° F (-40° to +80° C)
<b>Operating</b>	-13° to +140° F (-25° to +60° C)

<b>Certifications</b>	FCC, CE, RCM, ATEX, IECEx
<b>User Interface</b>	Bi-colour indication LED
<b>Quantity Per Box</b>	1 pc.
<b>Warranty</b>	2 years

\* Depends on the operational temperatures and number of fueling operations per day.

#### 4. Bracket Options

Nozzle Range	Nozzle P/N	Spout Diameter	Rotatable Bracket P/N	Static Bracket P/N
Elaflex ZVDSL1	ER242.1	24.0 mm	FNU015-0-0-NN-00	FNU020-0-0-NN-00

## 5. Installations Instructions

### Part List

- A. Static Bracket (Available in various sizes depending on the nozzle used)
- B. Base Unit
- C. 2x M5 Screws
- D. Backing plate set (2 pieces)
- E. Front Cover
- F. 4x M3 Screws
- G. Top Cover (with magnet for activation)
- H. 4x M3 Screws (short)

### Instruction

Place the static bracket (A) on the nozzle, preferably as far back as possible while still allowing the backing plate (D) to be fitted behind the static bracket. The static bracket has two screws which can be removed to fit onto the nozzle spout.

Place the base unit (B) onto the fitted static bracket as well as the backing plate set (D). Use the M5 Screws (C) to fit the components together. Once the parts are fitted, place on the front cover (E) and fit the M3 screws (F). Now place the top cover (G) on to the base and fit the remaining screws (H).

## 6. FNU900 Low frequency Reader & Transmitter Regulatory Regulatory Information

### US- FCC Warning Statement

FCC ID:SL6-NUC600

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

### FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

### Canada- ISED Warning statement

IC :26825-NUC600

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1. L'appareil ne doit pas produire de brouillage;
2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

### IC Radiation Exposure Statement:

This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance **20cm** between the radiator & your body.

*Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20cm de distance entre la source de rayonnement et votre corps.*

The transmitter module may not be co-located with any other transmitter or antenna.

Le module émetteur peut ne pas être compliant avec un autre émetteur ou antenne.

CAN ICES-003(B)/NMB-003(B)

## Australia/ New Zealand Compliance

This product conforms to Australia and New Zealand Radio Requirements.

## European Union Compliance

Conformite Européenne (European Community)

The full text of the EU declaration of conformity is available at the following internet address:

[www.hidglobal/certifications](http://www.hidglobal/certifications)

This product operates in the following frequencies:

- 432-435 MHz band with an RF output power less than 10dBm e.i.r.p

**Czech**

Společnost HID Global tímto prohlašuje, že toto radiové zařízení, číslo modelu FNU900, odpovídá požadavkům směrnice 2014/53/EU. Úplný text EU Prohlášení o shodě je k dispozici na následující internetové adrese:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

Tento výrobek používá následující frekvence:

- frekvenční pásmo 432-435 MHz, přičemž výstupní RF výkon je nižší než 10 dBm EIRP

**Danish**

HID Global erklærer hermed, at dette radioudstyr modellenummer FNU900 er i overensstemmelse med direktiv 2014/53/EU. Den fulde tekst i EU-overensstemmelseserklæringen kan læses her: [www.hidglobal/certifications](http://www.hidglobal/certifications)

Dette produkt fungerer ved følgende frekvenser:

- 432-435 MHz-bånd med en RF-udgangseffekt på mindre end 10 dBm e.i.r.p.

**German**

Hiermit erklärt HID Global, dass dieses Funkgerätmodell Nr.

FNU900 der Richtlinie 2014/53/EU entspricht. Der vollständige Text der EU-Konformitätserklärung steht unter der folgenden Internetadresse zur Verfügung:

[www.hidglobal/certifications](http://www.hidglobal/certifications)

Dieses Produkt arbeitet mit den folgenden Frequenzen:

- 432-435-MHz-Band mit einer HF-Ausgangsleistung von weniger als 10 dBm EIRP

**Greek**

Δια του παρόντος, η HID Global δηλώνει ότι ο παρών ραδιοεξπολισμός με αριθμό Μοντέλου FNU900 βρίσκεται σε συμμόρφωση με την Οδηγία 2014/53/EΕ. Το πλήρες κείμενο της δήλωσης συμμόρφωσης για την Ευρωπαϊκή Ένωση είναι διαθέσιμο στην ακόλουθη διαδικτυακή διεύθυνση:

[www.hidglobal/certifications](http://www.hidglobal/certifications)

Το παρόν προϊόν λειτουργεί στις ακόλουθες συχνότητες:

- Ζύγη των 432-435 MHz με ισχύ εξόδου ραδιοσυχνοτήτων (RF) μικρότερη από 10 dBm e.i.r.p. (ισοδύναμη ισοτροπικά ακτινοβολούμενη ισχύς)

**Estonian**

Käesolevaga kinnitab HID Global, et see raadioseadmestik mudelinumbriga FNU900 on vastavuses direktiiviliga 2014/53/EL. Kogu EL-i vastavusdeklaratsiooni tekst on saadaval järgmisel internetaadressil:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

See toode töötab järgmistel sagedustel.

- 432-435 MHz ribalaiusel raadiosagedusliku väljundvõimsusega vähem kui 10 dBm e.i.r.p.

**Finnish**

HID Global vakuuttaa täten, että tämä radiolaite, mallinumero FNU900, vastaa direktiiviä 2014/53/EU. EU-

vaatimustenmukaisuus-vakuutuksen koko teksti on saatavissa seuraavasta Internet-osoitteesta:

[www.hidglobal/certification](http://www.hidglobal/certification)

§

Tämä tuote toimii seuraavilla taajuuksilla:

- 432-2,435 MHz:n kaista, RF-lähtöteho alle 10 dBm EIRP

**Dutch**

Hierbij verklaart HID Global dat deze radioapparatuur modelnummer FNU900 in overeenstemming is met Richtlijn 2014/53/EU. De volledige tekst van de Europeese conformiteitsverklaring is te vinden op de website:

[www.hidglobal/certifications](http://www.hidglobal/certifications)

Dit product werkt op de volgende frequenties:

- 432-435 MHz-band met een RF-uitgangsvermogen van minder dan 10 dBm e.i.r.p.

**Maltese**

Hawnhekk, HID Global tidlikjara li dan it-Taghmir tar-Radju bin- numru tal-mudell FNU900 huwa konformi mad-Direttiva 2014/53/UE. It-test shih tad- dikjazzjoni ta' konformità tal- UE hu disponibbli f'dan l- indirizz fuq l-Internet:

[www.hidglobal/certifications](http://www.hidglobal/certifications)

Dan il-prodott jopera fil-frekwenzi li egħiġi:

- 432-435 MHz band b'RF output power ta' inqas minn +10 d Bm e.i.r.p.

**Swedish**

Härmed intygar HID Global att denna radioutrustning modell nummer FNU900 överensstämmer med direktiv 2014/53/EU. Den fullständiga texten med intyg om överensstämmande för EU finns på följande internetadress:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

Den här produkten fungerar på följande frekvenser:

- 432-435 MHz-band med en RF-uteffekt på mindre än 10 dBm e.i.r.p.

**French**

Par la présente, HID Global déclare que cet équipement radio Modèle FNU900 est conforme à la directive 2014/53/UE. Le texte intégral de la déclaration de conformité de l'UE est disponible sur le site Internet:  
[www.hidglobal/certification](http://www.hidglobal/certification)

Ce produit fonctionne aux fréquences suivantes:

- dans la bande de 432-435 MHz avec une puissance de sortie RF inférieure à 10 dBm PIRE

**Croatian**

Ovime tvrtka HID Global izjavljuje da je ova radiska oprema model FNU900 u skladu s Direktivom 2014/53/EU. Cjelokupan tekst europske izjave o sukladnosti dostupan je na sljedećoj internetskoj stranici:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

Ovaj proizvod radi pri sljedećim frekvencijama:

- pri frekvenciji od 432-435 MHz s izlažnom RF snagom manjom od 10 dBm e.i.r.p

**Hungarian**

A HID Global ezúton nyilatkozza, hogy ez az FNU900 típuszármű rádióberendezés megfelel a 2014/53/EU irányelvnek. Az EU megfelelőségi nyilatkozat teljes szövege elérhető a következő internetes címen:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

A termék a következő frekvenciákon üzemel:

- 432-435 MHz-es sáv, mely esetében RF kimeneti teljesítménye kevesebb, mint 10 dBm EIRP

**Italian**

Con il presente documento, HID Global dichiara che la presente apparecchiatura radio modello FNU900 è conforme alla direttiva 2014/53/UE. Il testo completo della dichiarazione UE di conformità è disponibile su Internet al seguente indirizzo:  
[www.hidglobal/certification](http://www.hidglobal/certification)

Questo prodotto funziona alle seguenti frequenze:

- Banda a 432-435 MHz con potenza di uscita RF inferiore a 10 dBm EIRP

**Lithuanian**

Šiuo „ deklaruoja, kad šis radio įrango modelis HID Global, kurio numeris FNU900, atitinka Direktyvą 2014/53/ES. Visą ES atitikties deklaracijos tekštą galite rasti šiuo interneto adresu:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

Šis gaminis veikia tokiais dažnais:

- 432-435 MHz dažnio diapazonas, RD išvesties galia yra mažesnė nei 10 dBm EIRP

**Latvian**

Ar šo uzņēmums HID Global apliecinā, ka šī radioiekārta, modeļa numurs FNU900, atbilst Direktīvas 2014/53/ES prasībām. Pilnu ES atbilstības deklarācijas tekstu var skaitīt vietnē [www.hidglobal/certifications](http://www.hidglobal/certifications)

Šis izstrādājums darbojas ar šādām frekvencēm:

- 432-435 MHz joslā; radiofrekvences izvades jauda ir mazāka par 10 dBm (ekvivalentā izotropiski izstarotā jauda).

**Polish**

Firma HID Global deklaruje niniejszym, że to urządzenie radioowe, model numer FNU900, spełnia wymogi określone w Dyrektywie 2014/53/UE. Pełny

tekst deklaracji zgodności UE jest dostępny pod

następującym adresem internetowym:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

Ten produkt działa na następujących częstotliwościach:

- w paśmie 432-435 MHz z równoważną mocą wyjściową RF wy promieniowaną izotropowo (EIRP) mniejszą niż 10 dBm

**Slovenian**

Družba HID Global izjavlja, da je ta radiska oprema, številka modela FNU900, v skladu z Direktivo 2014/53/EU. Celotno besedilo izjave EU o skladnosti je na voljo na naslednjem spletnem naslovu:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

Ta izdelek deluje pri naslednjih frekvencah:

- 432,435 MHz z izhodno močjo RF manj kot 10 dBm e.i.m.o. (EIRP)

**Slovak**

Spoločnosť HID Global týmto vyhlasuje, že toto rádiové zariadenie, model FNU900, je v súlade so smernicou 2014/53/EÚ. Úplné znenie vyhlásenia o zhode so smernicami EÚ je k dispozícii na stránke:  
[www.hidglobal/certifications](http://www.hidglobal/certifications)

Toto zariadenie pracuje pri nasledujúcich frekvenciách:

- 432-435 MHz pásmo s RF výstupným výkonom nižším ako 10 dBm EIRP

**Portuguese**

Por este meio, a HID Global declara que este modelo de equipamento de rádio, número FNU900, está em conformidade com a Directiva 2014/53/UE. O texto completo da declaração de conformidade da UE está disponível no seguinte endereço da Internet:  
[www.hidglobal/certification](http://www.hidglobal/certification)

Este produto opera nas frequências seguintes:

- 432-435 MHz com uma potência de saída de RF inferior a 10 dBm e.i.r.p.

**Spanish**

Por la presente, HID Global declara que este equipo de radio, modelo número FNU900 cumple la Directiva 2014/53/EU. El texto completo de la Declaración de Conformidad CE está disponible en la siguiente dirección de internet: [www.hidglobal/certifications](http://www.hidglobal/certifications)

Este producto opera en las siguientes frecuencias:

- Banda de frecuencia de 432,435 MHz con una potencia de salida de RF (PIRE) de menos de 10 dBm
