Gentlemen:

Please be advised that the Model NPort W2250A, NPort W2150A, NPort W2250A-T, NPort W2150A-T, Nport Device Server is manufactured for the global market but when marketed in North America under FCCID: SLE-W2X50A the EEPROM will be programmed at the factory to only operate and actively scan on these specific channels:

Channels 1-11, 2412-2462MHz 802.11b mode
Channels 1-11, 2412-2462MHz 802.11g mode

The following channels will be programmed at the factory to passively scan and will only listen and cannot send a probe request to initiate communication on these specific channels. Ad-hoc mode is always disabled on these passive channels.

Channels 36-48, 5180-5240MHz 802.11a mode
Channels 52-64, 5260-5320MHz 802.11a mode
Channels 100-140, 5500-5700MHz 802.11a mode
Channels 149-165, 5745-5805 802.11a mode

This information when programmed into the EEPROM will not be accessible and can not be changed by the end user.

If you have any questions please do not hesitate to contact us.

Sincerely,

Hung-Cheng Chao / Manager
