Request for Class II Permissive Change

FCC ID: SLKUNX-05G

Date: February 16, 2023

TO: Federal Communication Commission

Please be notified that we, the undersigned, (NCXX Inc.) declare that the reasons for this Class II permissive change are as below:

Circuit design, PCB, antenna, etc., all unchanged. Originally there was an n41 RF circuit, which was opened in software. With it, ENDC and ULCA were implemented. So it does not affect any RF performance other than n41. Change the software version to v0.0.29

The test strategy reference is as follows:

Case	Remark
Part 27	5G NR N41RF full test
Part 2.1093	RF Exposure Evaluation add N41

Thank you.
Sincerely.
