Re: Name change for MiHub 1.75 to MIHUBXR-R

To Whom it May Concern:

Earlier this year, testing was conducted by Washington Laboratories on a Mueller Systems, LLC product previously known as the MiHub 1.75. After testing was complete, the name of the product was changed to MIHUBXR-R to conform to the marketing convention for the product family that Mueller Systems employs.

Technically, the MIHUBXR-R model is identical to the product tested under the MiHub 1.75 name. Most of the information contained in the reports and data generated by Washington Laboratories has been modified to reflect the revised model name. However, some information (e.g., headers in certain data charts and picture captions) could not be revised because the images are not in a format that is readily edited. As a result, this letter is being provided as assurance that the information all pertains to the same equipment under testing for which authorization is being sought.

Please do not hesitate to contact me or Mueller System's FCC counsel, Pamela C. Cooper (cooperlaw@verizon.net; 703-450-0321) should you have any questions regarding this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Keefe", written over a light blue horizontal line.

Robert P. Keefe
