Description of Appearance and Functions of Product

Description of Appearance and Functions of Product

Distance and Projection Picture Size

The projection picture size is determined by the following factors: the distance between lens and screen, scaling ratio and video format.

The optimum projection distance of JMGO Smart Theater Projector ranges from 0.5 meter to 4 meters, beyond which the brightness and definition will decline resulting in unsound pictures.

The projected area is directly proportional to projection distance: i.e. the further, the larger, merely the definition of corresponding pictures will be sacrificed ; Users can choose the most suitable distance based on the actual conditions.

Introduction to Touch Power Button and Indicator Light

The power button of the device is a touch type with which a simple touch upon the button will perform the function of power switch. The indicator lights around the power button help the users to understand working conditions with the color changing.

- 1.Red light means the device is in standby mode
- 2.When the device is in standby mode, slightly touching the power button or tapping the “Power” button of remote control will power on the device and get projection mode started.

Remote Control

Focus Adjustment

The focus adjustment can be done with the focusing button   of remote which is a power driven process acquiring the optimum pictures of high definition.

Bluetooth Speaker

JMGO Projector in standby mode is ready automatically in blue-tooth mode and can be used as a separate blue-tooth speaker. Then JMGO projector can be connected through blue tooth to play music. See the following procedures:

- 1.Open the blue tooth of the device, and search for the blue-tooth devices connectable;
- 2.Choose the “JMGO-XX” among the listed devices and go matching;
- 3.Upon matching being done which is indicated by the blue light, the music can be played through JMGO device.

Keystone Correction

For keystone correction, please follow the steps as “Go to Settings>System Settings>Images>Keystone Correction”. When an inclined projection angle is inevitable, the users can get a standard square picture through the keystone correction

3D Play

During the playing of 3D movies, users can set the play modes of 3D movies through the shortcut menu called out by tapping lightly the “JMGO” button of remote control when the video playing interface is being displayed.

Network Setting

The product herein is compatible with both wired and wireless Internet connection:
For wired connection, please plug network cable into the port of the device directly.
For wireless connection, please follow the following steps: Go to Settings>Common Settings>Network Settings” and choose among the available networks for Wi-Fi connection.

System Version

Follow the path below as “Go to Settings>System Settings>About the Device Itself”, then the info about system version will be available.

System Update

The system of the device herein can be updated both online and locally.

Online System Update: The path to online system update is as follows: Settings-General Settings- Version Update-System Update. Upon “System Update” being chosen, the system will figure out automatically whether it is the newest version. And the version info of the system will be displayed on the screen, if it is the newest one, forget it, if it is not the newest, suggest on whether to update to the newest or not will also be available for the user to make decision.

Note: JMGO will continuously provide online system update and maintenance relative to our products and it is possible for us to recommend without prior notice online services of system update in order to serve the users with the latest software system and service contents.

Local System Update: In this pattern, a software update patch needs to be downloaded from official website of JMGO and then copied to the root directory of a mobile HDD or a USB disk which later needs to be connected with the USB port of certain device; afterwards, follow the following steps “General Settings-Version Update-System Update”, click on the “Local Update” button, then the system will automatically find the update patch itself and get the system installed and updated accordingly.

Note: The USB disk pulling out or power cutting off during the process of system updating shall be prohibited.

Video Signal Source Switchin

When external signal source is imported through HDMI port into the device, the user can enter the signal source setting interface by either calling out the shortcut menu upon tapping the “JMGO” button or clicking on the “Signal Source” button on the desktop. At the signal source setting interface, choose the favorable signal source, then the external video source will be displayed through the device onto the screen.

Wireless Screen Sharing Settings

The device herein is compatible with the wireless screen sharing. Following the steps “Go to Settings-Common Settings-Wireless Screen Sharing”, the user will go to the screen sharing interface where guide for the screen sharing settings will be available.

Peripheral Connection

JMGO Control APP

The device herein can be controlled by mobile phone for which the “JMGO Control” APP can be downloaded by scanning the below QR code. The APP controlling of the device will be a relaxing and pleasant experience for the user. JMGO APP is applicable to both Android and IOS.

Instructions to Environment Protection

The names and contents of hazardous substances or trace elements contained in the components of the device are as follows:

Component Name	Hazardous Substances or Elements					
	(Pb)	(Hg)	(Cd)	(Cr(VI))	(PBB)	(PBDE)
The Device	X	O	O	O	O	O
Remote Control	X	O	O	O	O	O
Cable	O	O	O	O	O	O
Power Adapter	X	O	O	O	O	O
Packaging Material	O	O	O	O	O	O
<p>O: means the contents of the relevant hazardous substance in all the homogeneous materials of the concerned component are all below the rated level as stipulated in China's national standard-GB/T26572-2011.</p> <p>X:means the contents of the relevant hazardous substance in all the homogeneous materials of the concerned component are all beyond the rated level as stipulated in China's national standard-GB/T26572-2011. And there is no feasible and alternative solution yet to this problem, the content of such substance, however, now conforms to the requirement on environment protection of RoHS.</p>

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

FCC ID: SMC-E8

Manufacturer's Name: SHENZHEN HOLATEK Co.,LTD

Trade Mark: JMGO

Model number: E8

Operating Temperature: -10° C to 40° C

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 0cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

This device in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. All essential radio test suites have been carried out.

1. CAUTION : RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

2. The device complies with RF specifications when the device used at 20cm form your body
