**Evaluation of Wanlida Group Notebook Computer  
FCC id: SMFPC81006N**

I have assessed the above referenced submission for Wanlida Group PC-81006N and found it to be compliant. The product is a Notebook Computer with Bluetooth.

The following points were noted and resolved during the evaluation.

1. SAR report

The photos in the SAR report did not align with the operating description and internal photos with regard to position of antennas and modules. A replacement report with the correct sample was provided.

2. Photographs

Internal and external photographs were not clear and did not provide sufficient detail. New photos were supplied meeting the FCC guidelines

3. Frequency Hopping

There was no information regarding compliance with 15.247(a)(1). This was subsequently received by completion of the standard BABT form and enclosed as a covering letter.

Yours sincerely

A handwritten signature in blue ink, reading 'T. D. Twynam'.
